

Junior High

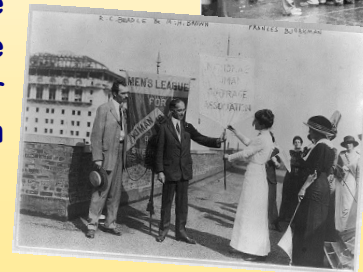

Eighth Grade Social Studies Highlights

Cold War and Beyond

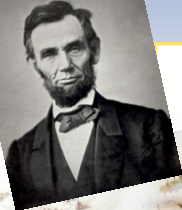

Eighth grade picks up where we left off in Seventh. Abraham Lincoln is elected and we are on to the Civil War. After the Civil war we study the settling of the western plains states and mountain states. This also includes the last of the wars with the Native Americans. We then go into a period of large scale industrial growth with another batch of even cooler inventions. We go through the Populist and Progressive eras. Then we learn about World War I, Roaring 20's, The Great Depression, WWII, the Cold War, and the end of the Soviet Union. We finish up discussing the changing world after the fall of the Soviet Union. The big highlight for 8th grade is taking the Constitution test. We take it after spring break.
