Social Studies Highlights

Sixth Grade

Stone Age

In sixth grade we study ancient history. We start from the very beginning with Stone Age hunter and gatherers. Then we go from farming villages to ancient civilizations. We go from ancient Mesopotamia to the Romans. After Rome we study the

Middle Ages starting with the feudal societies in Japan and Europe. This leads us into the Renaissance period and the age of

European exploration and conquest. We finish the year with our big Medieval Banquet. We decorate the gym to look like a medieval castle. All the sixth graders are Lords and Ladies.
