

**STRUCTURE PEST CONTROL ACT
AND
LAWN CARE PRODUCTS APPLICATION ACT**

In the spring of 2000, Illinois Legislation amended the Structural Pest Control Act and Lawn Care Products Application Act by adding SB0529, which pertains to our buildings and grounds care for pest control services in High School District 128. The amendments require service companies and applicators of pest controls to notify prior to and following applications of control chemicals. Advance notification of applications, under the law, will be provided to any concerned staff, student or parents of students requesting notification at a school owned facility.

Please return this form only if you wish to be notified prior to applications of herbicides or pesticides at Vernon Hills High School.
