A Seizure Action Plan (SAP) is a document that provides detailed health and medical information about a student and his/her epilepsy or seizure disorder. The SAP provides guidelines as to how to respond when a student is experiencing a seizure. This document will include input from the student’s guardian, physician, and/or neurology specialist.

Who uses it?
Every individual who interacts with a student who has a seizure disorder will benefit from this information. Specifically, school teachers, school nurses, coaches, and other individuals with supervisory roles should receive and review the SAP.

Where is it kept?
Typically, school nurses serve as the “gatekeeper” of the SAP. It is advisable for a school nurse to have the SAP in the student’s file, and the classroom teacher(s) should have a copy. Parents and physicians should keep a copy as well.

Why is it necessary?
When your child has been diagnosed with epilepsy, you quickly learn when a seizure is a medical emergency. The information in this SAP helps others to recognize your child’s seizures and determine when it’s an emergency. This prevents unnecessary 911 calls.

Who will benefit?
Everyone benefits from a SAP. Students are more likely to receive an appropriate response, school teachers and school nurses have the necessary information to respond and provide first aid, and parents are more at ease knowing that a written plan is in place.

Is there a cost involved?
No, a SAP is free provided that the student has access to, and visits, a physician treating their seizure disorder. The only cost involved is related to the time it takes to write and read the document.

How often is the SAP updated?
It will depend on the needs of each student and changes in his/her medical condition. Most students will have the SAP for the entire school year and maybe as long as they attend a given school. Students with more complex conditions may have their plan updated more frequently by their physician or medical specialist.
**Seizure Information:**

Seizure triggers or warning signs:

Student’s reaction to seizure:

**Basic First Aid: Care & Comfort:**

*Please describe basic first aid procedures*

Basic Seizure First Aid:
- Stay calm & track time
- Keep child safe
- Do not restrain
- Do not put anything in mouth
- Stay with child until fully conscious
- Record seizure in log

For tonic-clonic (grand mal) seizure:
- Protect head
- Keep airway open/watch breathing
- Turn child on side

(Please describe basic first aid procedures)

**Emergency Response:**

A “seizure emergency” for this student is defined as:

- Seizure Emergency Protocol: *(Check all that apply and clarify below)*
  - Contact school nurse at ____________________________
  - Call 911 for transport to __________________________
  - Notify parent or emergency contact
  - Notify doctor
  - Administer emergency medications as indicated below
  - Other

**Treatment Protocol During School Hours** *(include daily and emergency medications)*
