

**Semester: 2017 Fall first 8 weeks**

This syllabus is a plan, not a contract. Changes may occur during the term as the instructor deems necessary.

### **I. On-Ground Course Information:**

- **Course Title: Chemical Services II**
- **Course Number: COS 2004**
- **Prerequisites: Chemical Services I**
- **Credit Hours: 4**
- **Required Textbook and Supplies: Milady Standard Cosmetology Textbook 2016 Edition**
- **Recommended Texts and Supplies: 100% black uniform. Black Smocks can be purchased at the bookstore. 3” Binder, notebook paper, pencils, pens, colored pencils, tab dividers, highlighters, 1 sharpie and travel size first aid kit.**

**Course Description:** This course provides both classroom and clinical instruction in intermediate hair coloring, hair lightening, chemical waving, and chemical hair relaxing. The course consists of 50 classroom hours and 110 clinical hours as prescribed by the Kansas Board of Cosmetology.

### **IV. Learning Outcomes: Upon completion of this course, students will be able to do the following:**

1. Describe and demonstrate hair coloring and hair lightening procedures, removal of artificial color, and special effects in chemical waving.
2. Identify and demonstrate corrective color measures and chemical waving procedures.
3. Explain and demonstrate fillers and conditioners, and chemical hair relaxing procedures.
4. Identify special hair problems in chemical hair relaxing and demonstrate corrective measures for these problems.

The learning outcomes and competencies detailed in this course outline or syllabus meet or exceed the learning outcomes and competencies specified by the Kansas Core Outcomes Groups project for this course as approved by the Kansas Board of Regents.

### **VI. Credit Description:**

A credit hour is defined as one hour of classroom instruction and a minimum of two hours of out-of-class student work each week for approximately fifteen weeks for one semester of credit. So for every course credit hour, the typical student should expect to spend at least three clock hours per week of concentrated attention on course-related work, including but not limited to time attending class, as well as out-of-class time spent reading, reviewing, organizing notes, preparing for upcoming quizzes/exams, problem solving, developing and completing projects, and other activities that enhance learning. Thus, for a three hour course, a typical student should expect to spend at least nine hours per week dedicated to the course.

**VII. Common Learning Expectations:** All sections of Chemical Services II use the activities listed below to measure whether you learned a required learning outcome for this course:

**1. Hands on practicals**
