

Dear Parents & Caretakers,

To children, the summer slide means water, garden hoses and slippery plastic sheets. To teachers, the “summer slide” is the noted decrease in reading, writing, and math skills after a vacation with fewer books, pencils, and less math fact practice. While students attend Shrewsbury Public Schools, they spend countless hours working on reading, writing, and math skills. To support our students and their skills over the summer, we have put together Summer Reading and Summer Math Calendars.

For every day that your child reads, record the number of minutes read or the title of the book on the calendar. At the conclusion of each month your child can record his/her favorite book read and you will sign off. The math calendar provides ideas for different math activities each day. Your child can indicate the activities completed with a check in the box. When school begins they can bring the calendars in to show their new teacher their reading and math efforts.

These calendars can be found in the Elementary Handbook and on the Shrewsbury Public Schools website:

<https://schools.shrewsburyma.gov/curriculum/summer-reading>

As always, thank you for partnering with us in your child’s learning and growth. We hope you are able to enjoy a few good books yourself this summer!

# Entering 4th Grade Summer Math Calendar: July

Monday	Tuesday	Wednesday	Thursday	Friday
Write a word problem whose answer is 15. Have someone solve the problem. Choose another answer and make up a problem.	Write your 3 times tables up to $3 \times 10$ . Make flashcards for these and study. Have an adult quiz you.	Gather 3 store receipts. Find the total amount that was spent.	How many different ways can you make \$3.25? How many quarters can you have if you have \$3.25 in quarters only?	Pick a board game. Play with a friend. Write a few sentences after about what happened.
Write a story problem that can be solved using the number sentence $8 \times 7 = \underline{\quad}$ .	You went shopping with a \$5 bill and spent \$2.40. Is your change more or less than 40 dimes? Prove your answer.	Write your 4 times tables up to $4 \times 10$ . Make flashcards for these and study. Have an adult quiz you.	Figure your age out in months.	Go on a scavenger hunt for real-world examples of right angles (example: the corner of a book). Draw a picture of your favorite example.
A farmer has chickens and cows. What combination of animals could total 24 legs? Is there more than one combination?	Write a story problem that can be solved using the number sentence $50 + x = 95$ .	Solve for n: $n \times 8 = 4 \times 2$ $n = \underline{\quad}$ $12 + 15 = n \times 9$ $n = \underline{\quad}$ $25/5 = 1 \times n$ $n = \underline{\quad}$	Write your 5 times tables up to $5 \times 10$ . Make flashcards for these and study. Have an adult quiz you.	Roll 2 dice and multiply to find the product. Record the product. Do this 25 times. Create a bar graph with the results. Write about what you notice.
What time is it now? Write down that time and draw an analog clock showing that time. What time will it be in 45 minutes? What time was it 20 minutes ago?	Draw a picture of a pool that is a polygon (straight sides only). Make up dimensions for all sides. Calculate the area of this pool. Calculate the perimeter of the pool.	Write your 6 times tables up to $6 \times 10$ . Make flashcards for these and study. Have an adult quiz you.	Write a schedule for tomorrow that includes the hours and minutes of your activities.	Use a ruler to draw a rectangle measuring 12 cm long and 4 cm wide. Find the area and perimeter.
