

D99 DRUG & ALCOHOL FACTS

Most District 99 students choose not to drink alcohol or use other substances.

D99 TREND DATA SHOWS THAT ALCOHOL & MARIJUANA USE IS DECREASING, WHILE VAPING IS INCREASING.

Vaping / Tobacco

Data provided by the 2014, 2016, & 2018 district-wide anonymous Illinois Youth Survey. Average % of students who reported using in a 30-day period.

While most D99 students choose not to vape, the recent increase in nicotine use poses health and addiction concerns for those who do.

VAPED

Vaping nicotine can change the way your brain works and lead to addiction.

Vaping THC (the psychoactive chemical in marijuana) or "dabbing" increases the risks associated with marijuana use because of its concentrated toxic content.

Dabbing can cause problems with learning and memory, impair coordination and decision-making, increase your risk of mental health problems, and lead to addiction.*

VAPING & DABBING

When you choose not to drink alcohol or use substances:

- ✓ you protect your developing brain & body.
- ✓ you are more successful in school.
- ✓ you help support your physical & emotional health.
- ✓ you significantly reduce your risk of addiction.*
