

Norwood Police Department

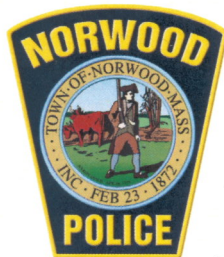

School Resource Officers

TEXT-A-TIP LINE

The tip line is a way that students can get information to school resource officers without being seen by their peers. All information sent on the tip line is privacy protected, not anonymous. Information given by a student will be followed up and investigated. Things we want students to report are weapons carried by students, bullying, drug activity, and assaults (fights).

This is also a great way for parents to send a tip without their child knowing they informed the police of a potential dangerous situation in the school.

Please help the School and the Resource Officers in making a safe place for our children to learn.

School Resource Officers
