

MENOMINEE INDIAN SCHOOL DISTRICT

341.2

EDUCATION FOR EMPLOYMENT

The Menominee Indian School District considers education for employment as a series of curriculum programs primarily offered to develop interests, attitudes, knowledge and skills which will assist students in becoming contributing citizens. The District advocates a career, vocational and technological education that enhances the lifestyles of its graduates.

The District envisions education for employment to be progressively realized through continual development of relevant curricula based on staff-student abilities, along with curriculum offerings and by coordination of effort inside and outside of the individual departments of the schools, in accordance with state laws and regulations and the District's education for employment plan.
