

MENOMINEE INDIAN SCHOOL DISTRICT

345.3

HOMEWORK

Homework is school work assigned to be completed primarily outside of the classroom. The purposes of homework are to practice, preview, and check for understanding and process previous learning. Homework should provide students with the opportunity to personalize the information they have, or will learn, as well as develop independence. Homework should support and enhance learning, provide feedback to teachers about learning and allow students to practice skills and deepen their knowledge. No more than 10% of homework can be counted toward the quarter/semester grade.

The Board of Education encourages homework as a part of the regular instructional program. Guidelines shall be developed at each school for assignment of homework.
