FOR IMMEDIATE RELEASE:

Date: March 8, 2021
From: Public Information Officer Lori Beatley

Plumas County Public Health Transitions to state’s My Turn Vaccination Platform

The state of California is requiring all counties to use the MyTurn vaccination platform by the end of March. The purpose for this mandate is for consistency and ensuring all relevant information is being reported in the same manner. The MyTurn platform is meant to be an “all in one” platform. It must be used for inventory, registration and administering the vaccine. Plumas County will start transitioning to the MyTurn platform and will be discontinuing use of the Plumas specific Information Portal located on the county’s website.

Effective today, the Information Portal will be taken off the county website and the MyTurn link will be available. There are three 1st dose clinics scheduled this week and the Information Portal has been used to fill appointments for these clinics. First dose clinics are scheduled weekly based on the weekly allocations provided to the county from the state. Therefore, MyTurn will not be used until the week of March 15. This will provide some time for those who have not yet been vaccinated to enter their information into the MyTurn platform. The MyTurn platform does not have the ability to import information from the county’s portal. Those who have provided their information in the county’s Information Portal, and have not yet been schedule for a vaccine, must provide their information into the MyTurn platform.

Once an individual has provided their information in the MyTurn portal, are eligible for vaccination and a clinic has been opened, the individual will be notified via e-mail or text on smart phone. The individual then goes to the MyTurn platform to register to be vaccinated. If an individual is not yet eligible to receive a vaccine it is still recommended they provide their information in MyTurn, so when they become eligible they will be notified.

There may be some difficulties with the transition, but PCPHA staff are working hard to identify and solve issues as they arise, and to continue the equitable rollout of vaccine supply. See the link for MyTurn https://myturn.ca.gov/ and there is a phone line for assistance, 1-833-422-4255.
