September 3, 2020

Dear Little Silver Families,

We all know that this is the time of year when families are busy investing in a wide variety of school supplies for children to use and take back to the classroom for the coming year. Given our current circumstances, the district has made the decision to try and find a way for parents to make an investment in the health and safety of each child in order to help maintain the healthiest setting possible in our schools. After considering a number of factors, the decision was made to create a Student Safety Starter Kit that is being made available to all families. The kit will include a 3-ply cloth mask for the student and a portable protective barrier for each student desk. The final item in the kit is mandatory tech insurance for the district-issued Chromebook devices being distributed to all families. The total cost for the all three items in the kit is \$79.

All families will receive an email with an invoice attached to purchase the kit. Please follow the link in the message to submit payment and complete the purchasing process. If you have any questions, please utilize the [lsrestart@littlesilverschools.org](mailto:lsrestart@littlesilverschools.org) address or contact the Board Office directly at 732-741-2188.

Respectfully,

A handwritten signature in cursive script that reads "Michael E. Ettore".

Superintendent
