

STUDENT HEALTH SERVICES

Nunez Community College does not have a Student Health Services Office. In the event of an emergency requiring medical attention, the instructor or supervisor should determine the severity of the injury and call 911 Emergency immediately, if necessary.

In some cases, health care professionals on campus may provide temporary care or health counseling for students who are ill or injured. In an emergency situation, the professional may administer FIRST AID only—including CPR—as indicated until services of a physician or EMS can be obtained.

In case of major accident--one that requires immediate medical or surgical attention--the instructor/supervisor should call emergency 911 for an ambulance and the person should be sent to the Emergency Room of the nearest hospital and the nearest relative notified immediately. The student will be responsible for the medical cost. A report of ANY incident should be made by the instructor/supervisor to FACILITIES/SAFETY as soon as possible on form DA2000.

In cases of questionable mental health or instability leading to possible accident, injury, or violence, the instructor or supervisor should first call campus police (7499) and then contact the counselor on duty. The counselor may deem it necessary to refer the student to a mental health professional. If a counselor is unavailable, the administrator on duty should be contacted.

All students are required to furnish STUDENT AFFAIRS with emergency contact information listing individuals who can be notified of accidents or injuries that occur during school hours. Responsibility for treatment is to be assumed by the parents of minor students and by adult students themselves.

The nearest hospital emergency room cooperating with the facility is:

**St. Bernard Health Unit
2712 Palmisano
Chalmette, La 70043**
