	Miscellaneous.....	25-26

GRADES & REPORTING

Student grades are determined and mailed directly to parent(s)/guardian(s) on a mid-term and semester basis. Each semester is approximately 20 weeks long and mid-term is approximately half the semester (10 weeks). Every students will receive a progress report 4 times throughout the school year as set forth by the school calendar. Mid-term and final semester grades are generally determined by:

- A** *A superior grade for outstanding performance*
- B** *An excellent grade for above average performance*
- C** *An average grade for satisfactory performance*
- D** *A passing grade for below average performance*
- F** *A failing grade*
- I** *Required work is incomplete. Students have **ten days** to complete work before grade reverts to "F"*
- +** *Following a letter grade indicates slightly higher grade*
- *Following a letter grade indicates slightly lower grade*

CREDITS

Credits are awarded to secondary students. Student graduation requirements (including courses and credits) are determined by the student's home district. Credit is awarded for successful completion of course requirements on the following basis: .5 per semester (1.0 per year) for academic courses and physical education. Students will receive credit based on their length of enrollment and performance.

ASSIGNMENTS/HOMEWORK

Homework is a vital part of the educational process. It provides opportunities for students to reinforce skills, gain a better understanding of the subject matter, and extend their thinking through research and application. Homework helps students hone their work habits and organizational and study skills; it helps them to increase independence and responsibility. In addition, homework connects parents/guardians with what their children are learning in school. Educational research shows that students who complete appropriate homework assignments demonstrate significant gains in academic achievement. At CAE we are emphasizing independence, time management and responsibility.

- Students are expected to complete homework assignments nightly. Although daily assignments will not necessarily be written, teachers will assign written assignments several times a week. Depending on the students' grade level, home assignments may include research, reviewing vocabulary, studying for tests and quizzes, reading assigned texts/related subject matter, or preparing

reports. Primary grade assignments may include handwriting practice, story reading, vocabulary practice, skill worksheets, book reports, etc.

- Homework is due on the date specified by the instructor and will be collected at the beginning of that class period. Points will be deducted for late homework. If you have an excused absence on the day that homework is due, that homework must be turned in at the beginning of class on the day that you return from your absence.
- Teachers will check homework for completion and accuracy. Written homework will be corrected with appropriate feedback given to students according to the lesson design established by the teacher. For example, the work may be self-corrected after correct responses are reviewed in class, peers may correct written work, or the teacher may collect and grade the homework. Teachers may require that students obtain a parent signature on written homework.
- Homework will be factored in as a percentage of the total quarterly grade. Extended projects will also account for a portion of the total quarterly grade.
- Students must put their names on their homework assignments. Students who fail to write their name on papers may not receive credit for the assignment.

Students are encouraged to contact teachers, and utilize study hall if they need assistance with class work especially after an extended absence.

MAKE-UP POLICIES DURING ABSENCES

1) Excused Absences

The student has the amount of days missed, plus one day to complete their missing class assignments and homework due to an excused absence. Due dates for assignments missed during excused absences will be written on top of the assignment with teacher's initials.

2) Unexcused Absences

If a student has an unexcused absence, he/she must complete the missing work. This includes class assignments, homework assignments, projects, quizzes, and/or tests. All work will be due the next day, no matter how many days in a row they are unexcused. Due dates for assignments missed during unexcused absences will be written on top of the assignment with teacher's initials.

Homework Policies

If a homework assignment is not completed and turned in on time, the following may occur:

- The student may receive a detention during lunch.

- The student will still need to turn in the homework assignment and it will be considered late.
- If the student does not understand a homework assignment, they have the opportunity to ask for assistance from staff at the beginning of the school day, during study hall, and at the end of the school day. Not understanding a homework assignment is not an excuse for it not being completed by the due date.

ENGLISH

Creative Writing

Grade level: 10, 11 & 12

01104A000

Course length: 1 sem.

Section Number: 07

Course Credit: 0.5

This course is designed to help students become more effective writers. Students write papers in various genres such as creative nonfiction, short story, poetry and drama. Most assignments require completing various steps in the writing process such as preparation of rough drafts, editing and revision. These tasks develop the editorial skills of students, which in turn improve their ability to revise their own work.

Corrective Reading

Grade level: All

01068A000

Course length: 1 year

Section Number: 53

Course Credit: 1.0

This course offer diagnostic and remedial activities designed to correct reading difficulties and habits that interfere with students' progress in developing reading skills and understandings. Activities are chosen to increase or improve students' reading comprehension, reading technique, fluency, decoding, and general literacy skills. The course focuses on reading skills with assistance to students needs to help them develop new strategies to become more efficient readers.

Composition

Grade level: All

01101A000

Course length: 1 sem.

Section Number: 300

Course Credit: 0.5

This course focuses on students' writing skills and develops their ability to compose different types of papers for a range of purposes and audiences. Students can explore and practice descriptive, narrative, persuasive, or expository styles as they write paragraphs, essays, letters, applications, formal documented papers, or technical reports.

English 1

Grade level: 9 & 10

01001A000

Course length: 1 year

Section Number: 08

Course Credit: 1.0

This course is designed for students to improve and expand their reading, writing, research, public speaking and listening skills and to review the conventions of grammatical structure, usage and agreement. Students will survey literature from a variety genre, including prose, poetry, biographies and essays. Formal written essays and oral presentations are essential components to this course.

English 2
Grade level: 10 & 11

01002A000
Course length: 1 year

Section Number: 09
Course credit: 1.0

This course focuses on vocabulary enhancement, writing skills and essay development. In addition to writing a selection of essays, students will read several novels and other literary works. Formal written essays and oral presentations are essential components to this course.

English 3
Grade level: 11 & 12

01003A000
Course length: 1 year

Section Number: 10
Course credit: 1.0

This course encourages students to study American writers and literature. This course embodies an integrated, inquiry-based approach to reading, writing, speaking and research. Students will read diverse works and selected novels.

English 4
Grade level: 11 & 12

01004A000
Course length: 1 year

Section Number: 11
Course credit: 1.0

This course explores representative readings in the literature of the British Isles from the time of Beowulf to the present. Students trace the development of genres over time, including myths, legends, and the romance.

Literature
Grade level: All

01053A000
Course length: 1 sem.

Section Number: 57
Course credit: 0.5

This course engages students in the careful reading and critical analysis of classic and contemporary literature. Through the active reading of a rigorous selection of texts, students will deepen their understanding of the ways writers use language to provide both meaning and pleasure for their readers. Class activities center on reading and radiate to discussion, composition and presentation. Students who still enjoy the satisfaction of a great story, or who want to re-discover that feeling, will enjoy this class.

Public Speaking
Grade level: 10, 11 & 12

01151A000
Course length: 1 sem.

Section Number: 58
Course credit: 0.5

This course is designed to help students improve their speaking abilities and to develop the skills of effective communication in both formal and informal settings. A variety of speaking situations will be included like public speeches, demonstrations and large group discussions. Other course topics include research and organization, writing for verbal delivery, visual and presentation skills, and the development of self-confidence.

World Literature
Grade level: 11 & 12

01058A000
Course length: 1 sem.

Section Number: 43
Course credit: 0.5

This course involves literature of diverse nations and cultures. There is a variety of genres that will be examined throughout the semester including drama, poetry, short stories, literary criticisms and novels.

MATHEMATICS

**Advanced Algebra
with Trigonometry & Statistics**
Grade level: 11 & 12

02106A000
Course length: 1 year

Section Number: 21
Course credit: 1.0

Students will study exponential and logarithmic functions, conic sections, central tendency, statistical graphs, dispersion, counting principle, probability, right triangle trigonometry, radian measure, circular functions and inverse circular functions. The instruction is designed to help students both learn and retain mathematical concepts while connecting them to the real world.

Pre-Algebra
Grade level: 9

02051A000
Course length: 1 year

Section Number: 66
Course credit: 1.0

Pre-Algebra courses increase students' foundational math skills and prepare them for Algebra 1 by covering a variety of topics, such as properties of rational numbers (i.e., number theory), ratio, proportion, estimation, exponents and radicals, the rectangular coordinate system, sets and logic, formulas, and solving first-degree equations and inequalities.

Algebra I
Grade level: 9 & 10

02052A000
Course length: 1 year

Section Number: 22
Course credit: 1.0

Students learn to describe the world around them with algebraic expressions, equations, graphs and statistics. Applications, calculators and computers provide the context for the abstract language of algebra. Topics include properties of real numbers, linear equations and their graphs, solving equations, algebraic expressions, general problem solving, properties of exponents, and factoring.

Algebra II
Grade level: 10, 11 & 12

02056A000
Course length: 1 year

Section Number: 23
Course credit: 1.0

This course provides all the basic concepts studied in a second-year algebra course, including manipulation, polynomial and exponential equations, mathematical models, use of graphing calculators, matrices and irrational algebraic functions.

Functions of Algebra & Geometry **02074A000** **Section Number: 24**
Grade level: 10, 11 & 12 **Course length: 1 year** **Course credit: 1.0**

Students will use a basic ability in algebra and geometry to solve math problems required in commercial and industrial applications. An emphasis is on measurements, converting from metric to customary, use of formulas, costing materials for construction work, estimating, checking for accuracy, and calculator applications.

General Math **02002A000** **Section Number: 63**
Grade level: All **Course length: 1 year** **Course credit: 1.0**

This course reinforces and expands students' foundational math skills, such as arithmetic operations using rational numbers; area, perimeter, and volume of geometric figures, congruence and similarity, angle relationships, the Pythagorean Theorem, the rectangular coordinate system, sets and logic, ratio and proportion, estimation, formulas, solving and graphing simple equations and inequalities.

General Applied Math **02151A000** **Section Number: 54**
Grade level: 10, 11 & 12 **Course length: 1 year** **Course credit: 1.0**

This course reinforces general math skills, extend these skills to include some pre-algebra and algebra topics and use these skills in a variety of practical, consumer, business and occupational applications. Course topics include rational numbers, measurement, basic statistics, ratio, proportion, basic geometry, formulas and simple equations.

Geometry **02072A000** **Section Number: 25**
Grade level: 10, 11 & 12 **Course length: 1 year** **Course credit: 1.0**

Students will learn to recognize and understand the various geometric shapes and solids, and know their properties. They will develop deductive reasoning ability and use it on proofs of geometric ideas. The course includes such topics as polygons, similar figures, circles, areas and volumes, three-dimensional figures, and drawing and construction to lines, planes and angles.

Trigonometry **02103A000** **Section Number: 400**
Grade level: 11 & 12 **Course length: 1 year** **Course credit: 1.0**

Students will prepare for work in calculus and will include the following topics: trigonometric and circular functions; their inverses and graphs; relations among the parts of a triangle; trigonometric identities and equations; solutions of right and oblique triangles; and complex numbers.

Pre-Calculus
Grade level: 11 & 12

02110A000
Course length: 1 year

Section Number: 65
Course credit: 1.0

Students will prepare for work in calculus and will include the following topics: study of complex numbers, polynomial, logarithmic, exponential, rational, right trigonometric, and circular functions, and their relations, inverses and graphs, vectors; the polar coordinate system; conic sections; mathematical induction; matrix algebra; sequences and series; and limits and continuity.

SCIENCE

Biology
Grade level: All

03051A000
Course length: 1 year

Section Number: 29
Course credit: 1.0

Biology is the study of life. The course includes studies in the following areas: scientific problem solving, cells, genetics and evolution, classification, microbiology, plants, invertebrates, vertebrates, human biology, use of a microscope, and ecology.

Chemistry
Grade level: 10, 11 & 12

03101A000
Course length: 1 year

Section Number: 30
Course credit: 1.0

Students will investigate chemical concepts in this course. Throughout the course the concepts of chemical bonding, physical and chemical properties, metric measuring, chemical formula writing, atomic theory and the periodic table, and acids and bases.

Earth Science
Grade level: 10, 11 & 12

03001A000
Course length: 1 year

Section Number: 31
Course credit: 1.0

Students will study the earth systems that have made and are changing our planet earth. This course involves units in astronomy, geology, meteorology and physical geography.

Environmental Science
Grade level: 10, 11 & 12

03003A000
Course length: 1 year

Section Number: 32
Course credit: 1.0

Students in this course will explore the human role in the ecosystem balance. Topics of study include soil and water analysis, biodiversity, pollution, and renewable and nonrenewable resources.

Physical Science
Grade level: All

03159A000
Course length: 1 year

Section Number: 46
Course credit: 1.0

This course involves the study of structures and states of matter. Students will get a foundation in laboratory techniques, use of the scientific method, measurement and data collection. Students will investigate the impact of science and technology on society.

Unified Science
Grade level: All

03202A000
Course length: 1 year

Section Number: 62
Course credit: 1.0

This course combines more than one branch of science into a cohesive study or may integrate science with another discipline. General scientific concepts are explored, as are the principals underlying the scientific method and experimentation techniques.

SOCIAL STUDIES

Social Studies
Grade level: All

04305A000
Course length: 1 year

Section Number: 60
Course credit: 1.0

This course enables students to study a group of related subjects addressing the elements and structures of human society that may include economic, geography, history, citizenship, and other social studies related disciplines.

Contemporary U.S. Issues
Grade level: 10, 11 & 12

04106A000
Course length: 1 sem.

Section Number: 47
Course credit: 0.5

This course provides students an opportunity to study and analyze the political, economic and social issues facing the United States. These topics include contemporary issues dealing with the family, legal systems, our culture, and other related issues. Students will identify various contemporary issues, analyze their causes, discuss the effects and propose solutions.

Contemporary World Issues
Grade level: 10, 11 & 12

04064A000
Course length: 1 sem.

Section Number: 33
Course credit: 0.5

This course deals with recent world, national, state and local affairs and how events affect Americans as well as other citizens of the world. Students will use current publications and visual materials to track, analyze, and discuss selected news events. Students will be required to write papers analyzing the significance, supporting opinions, and reaching conclusions about the impact of these events.

Law
Grade level: 10, 11 & 12

04162A000
Course length: 1 sem.

Section Number: 34
Course credit: 0.5

This course gives students an overview of law in the United States. Students will learn and understand basic concepts of law that includes criminal law, civil law, juvenile law, family law and individual rights. Since law evolves constantly and specific law concepts are controversial, class participation and discussion will be a major component of the course.

World Geography
Grade level: 9 & 10

04001A000
Course length: 1 year

Section Number: 38
Course credit: 1.0

Geography is the study of the earth and its systems, and the relationship of people to their environment. In this course, emphasis is on physical and cultural geography. Students will learn about the five themes of geography and be able to apply them to the regions studied. Students will develop skills in research, outlining, oral presentations and mapping.

World History
Grade level: 9 & 10

04051A000
Course length: 1 year

Section Number: 55
Course credit: 1.0

This course includes the study of ancient, medieval and modern world societies. Attention is given to the types and roles of government, major philosophies and religions, and the achievements and challenges faced by societies over time.

World People Studies
Grade level: All

04062A000
Course length: 1 sem.

Section Number: 61
Course credit: 0.5

This course allows students to study various types of subgroups that have something in common such as religion, gender, or culture. The course focuses on a group of people rather than a specific region and examines a subgroup's history, politics, economics, and/or culture.

Civics
Grade level: 9

04161A000
Course length: 1 sem.

Section Number: 165
Course credit: 0.5

Civics courses examine the general structure and functions of American systems of government, the roles and responsibilities of citizens to participate in the political process, and the relationship of the individual to the law and legal system. These courses do not typically delve into the same degree of detail on constitutional principles or the role of political parties and interest groups as do comprehensive courses in U.S. Government.

Economics
Grade level: 10, 11 & 12

04201A000
Course length: 1 sem.

Section Number: 03
Course credit: 0.5

Economics is the study of how people manage their resources to satisfy the needs of the society. This course will provide students with an understanding of the production, distribution and consumption of goods and services and their management. Students will focus on demand and supply, markets, labor management, monetary policies, investment and personal finances.

Current Issues in Economics 04207A000

Grade level: 11 & 12

Course length: 1 sem.

Section Number: 02

Course credit: 0.5

Everyone in a market economy is engaged in buying, selling, producing and consuming; the economy is basic to every facet of daily life. Understanding the interplay of the economic forces on personal decisions, community life and global political goals is essential to the success of an informed citizenry. This course will choose three current problems: 1) personal, such as the housing crisis or unemployment, 2) community, such as health care reform or school funding, 3) global, such as the trade deficit or military commitments. The positive and negative effects of several possible solutions to each problem will be analyzed and result in one of several assessment tools: 1) parliamentary style debate of suggested legislation, 2) a research paper based on a student hypothesis, 3) a group project including a media presentation demonstrating a problem and/or a solution. While the problem/solution method will be taught through specific crises, emphasis will be placed on the usefulness of this method to all decision making.

FINE & PERFORMING ARTS

Ceramics
Grade level: All

05159A000
Course length: 1 sem.

Section Number: 51
Course credit: 0.5

This course is an introduction to ceramics focusing on creating functional and artistic clay forms. Students will create various ceramic pieces from a variety of methods including pinch, coil and slab. This course will include techniques of hand building, decoration and sculptural forms. Students will also be given a short introduction to the pottery-wheel. Students will use different mediums, including, but not limited to, clay, wood, wire, metal, plaster and found objects.

Crafts
Grade level: All

05165A000
Course length: 1 sem.

Section Number: 52
Course credit: 0.5

This course introduces the students to, but is not limited to, off-loom weaving, basket making, beadwork, wire wrapping, papermaking, simple bookmaking, stained glass and calligraphy. Basic elements and techniques of design, composition and structure are emphasized in this course. The student learns to construct, through proper use of tools and techniques, products in wood, clay, metal, paper and other media. The student learns to express himself in basic structure, function and application of craft procedure.

Art Appreciation
Grade level: All

05151A000
Course length: 1 sem.

Section Number: 17
Course credit: 0.5

An introductory course designed for students to learn basic skills in art. Areas of study will include drawing, painting and sculpture. Activities in art appreciation and art history will help students develop concepts and express their viewpoints on a variety of subjects.

Film Studies
Grade level: All

05168A000
Course length: 1 sem.

Section Number: 12
Course credit: 0.5

This course focuses upon the analysis and appreciation of films. Students learn motion picture production, storytelling techniques, filmmakers' responsibilities, and the history of film and the importance of film in our society. Students study classic films and important filmmakers.

Introduction to Theatre
Grade level: All

05051A000
Course length: 1 sem.

Section Number: 49
Course credit: 0.5

An introductory course designed to expose students to a variety of the elements that make up the art form of theatre. Areas of focus include improvisation/theatre games, theatre terminology, theatre history, structure of play production, acting performance styles and the basic elements of technical theatre.

Jewelry Making
Grade level: All

05166A000
Course length: 1 sem.

Section Number: 18
Course credit: 0.5

Students will create jewelry pieces using a variety of materials. They will create rings, earrings, necklaces and other pieces of jewelry using materials such as beads, wire, cotton cord and embroidery floss.

Music Appreciation
Grade level: All

05118A000
Course length: 1 sem.

Section Number: 19
Course credit: 0.5

Students will use art, literature and music to explore human expression and achievement, critical thinking, communication between cultures and across generations, and how much more alike than unlike human beings are. They will read literary selections like essays, short stories and poems; view films with strong music themes; view snippets of various videos apropos of the day's themes; and listen to songs from a wide variety of genres. Students will react and respond in class discussions and in guided written assignments. They also have the opportunities to share musical selections of their own to illustrate some of the themes and subjects discussed during class.

Painting
Grade level: All

05157A000
Course length: 1 sem.

Section Number: 50
Course credit: 0.5

This course develops basic two-dimensional principles with paint media. Painting teaches students the correct procedures of watercolor, acrylics and oil painting. Emphasis is placed on the development and exploration of painting media and techniques in the creation of original works of art. Students will utilize and explore a variety of different media including graphite, colored pencil, pen and ink, charcoal, pastels, watercolors, and oil paints. Students are encouraged to advance their own personal skill level and artistic voice.

Printmaking
Grade level: All

05161A000
Course length: 1 sem.

Section Number: 56
Course credit: 0.5

This course exposes students to create artistic prints using a mass production approach. This media includes stamping, etching, engraving, linoleum, stencils, block-out and silk-screen. Printmaking uses both images and words through an artist's creative skills and techniques.

FOREIGN LANGUAGE

Spanish 1
Grade level: All

06101A000
Course length: 1 sem.

Section Number: 20
Course credit: 0.5

An introductory course where students will learn the basics of the Spanish language. The focus will be on language that can be used daily in the students' academic and personal lives. Students will develop skills of listening, speaking, reading and writing in Spanish. It also exposes students to the cultures of the various Spanish-speaking countries.

PHYSICAL EDUCATION

Health
Grade level: 9 & 10

08051A000
Course length: 1 sem.

Section Number: 26
Course credit: 0.5

Students will be given the opportunity to develop life-long, healthy habits. Students will learn problem-solving and critical thinking skills and will be given fact-based information to help them develop healthy behaviors. Topics include: decision-making, improving relationships, emotional health, hygiene, sexual health issues, drugs, alcohol, human reproduction, and basic structure and function of the human body.

Physical Education
Grade level: All

08001A000
Course length: 1 year

Section Number: 27
Course credit: 1.0

This course is designed to teach students the foundation skills for physical fitness. Students will learn basic skill techniques and participate in various team and individual sports. The course will include knowledge, skill development, rules and safety to a variety of sports. Students will be expected to develop an understanding of the principles of exercise, diet, hygiene and recreational activities as they relate to healthy life-styles.

Team Sports
Grade level: All

08002A000
Course length: 1 sem.

Section Number: 28
Course credit: 0.5

This course is designed to provide students with the knowledge, experience, and an opportunity to develop skills in more than one team sport. Sports included in the course are volleyball, basketball, soccer, and so on.

Driver's Education
Classroom ONLY
Grade level: 10, 11 & 12

08151A000
Course length: 1 sem.

Section Number: 06
Course credit: 0.5

The classroom phase is required of every student for graduation. Students will be expected to develop an understanding of the rules of the road. The course includes defensive driving techniques, attitudes and emotions, adverse driving conditions, buying/maintaining/insuring your car, the effects of alcohol and drugs on driving, information included in the *Illinois Rules of the Road* booklet, and other topics.

COMPUTER SCIENCE

Computer Applications
Grade level: All

10004A000
Course length: 1 sem.

Section Number: 05
Course credit: 0.5

Students will review proper keyboarding techniques, develop skills for word processing, spreadsheets, graphics, presentations and database applications. Students will create many original assignments applying the applications learned in class. Software used will be Microsoft Office. MLA and APA formatting procedures are also covered. Class assignments may include Internet activities.

BUSINESS & MARKETING

Introduction to Business
Grade level: All

12051A000
Course length: 1 sem.

Section Number: 04
Course credit: 0.5

This course is an introduction to the business concepts and skills required in today's marketplace. Students will have a better understanding of business practices and procedures. Topics include: business ownership and management, marketing operations, basic economic concepts, business ethics, employer/employee relationships, human resource issues, and careers in business. Students will have the opportunity to start their own business in this course.

HOSPITALITY & TOURISM

Food and Nutrition
Grade level: All

16054A000
Course length: 1 sem.

Section Number: 111
Course credit: 0.5

Nutrition and Food Preparation courses provide students with knowledge and skills about food preparation and/or production, with a strong emphasis on nutrition, balanced diets, and satisfying special dietary needs. Topics typically include assessing nutrient content, the science of food and nutrition, instruction in how to plan and prepare meals, experience in the proper use of equipment and utensils, and background on the nutritional needs and requirements for healthy living. Some classes place a heavier emphasis on the nutritional components of a balanced diet, while others concentrate on specific types of food preparation. Course content may also cover additives, contaminants, foodborne illnesses, and food technology.

Miscellaneous

MISCELLANEOUS

***Business Management
& Entrepreneurship***
Grade level: 11 & 12

22210A000

Section Number: 41

Course length: 1 sem.

Course credit: 0.5

Entrepreneurship will provide students with knowledge and skills necessary to own and operate their own small businesses. Students will examine the environment of small business ownership, the procedures and skills necessary to open a small business, and the policies and practices of a successful small business operation. Entrepreneurship will emphasize a hands-on approach to small business ownership. “Real” entrepreneurs will be guest speakers. Each student will learn how to write a business plan for a business that matches their interests.

Consumer Education
Grade level: 11 & 12

22210A000

Section Number: 01

Course length: 1 sem.

Course credit: 0.5

In this course, students will learn the importance of citizen participation in the policies of business and government in the economic system of the United States. Students will gain knowledge necessary to make wise economic decisions that will benefit their personal and professional lives. The major areas of study will focus on economic decisions, budgeting, banking, investing, using credit, advertising, car and home buying, insurance, taxes, comparison-shopping, and good financial management. The stock market will also be discussed in detail.

Child Development
Grade level: All

22204A000

Section Number: 13

Course length: 1 sem.

Course credit: 0.5

This course is designed for students interested in understanding the growth and development of infants and children. Students will gain knowledge of the intellectual, physical, social and emotional development of children from conception to adolescence. It includes prenatal development, parenting, decision-making, environmental and
