

Professional Collaboration

One of our core beliefs includes the importance of family, school and community partnership. Professionals strongly recommend our schools due to our ability to simultaneously provide intensive therapeutic interventions, a strong academic program, and a supportive environment which includes a structured behavior management system based on each student's strengths and an array of supportive interventions..

This delicate balance in our schools is supported by deep collaboration with our partnering districts and outside resource providers, such as therapists, psychiatrists, and educational advocates. The successes of our students requires a close partnership with all of you as we push toward our common goals for the student.
