

Highest Clinical & Academic Standards

Through our dedication to our students, families, and communities, we make significant changes in the lives of our children, adolescents, and families. The Connections Organization Schools have a twenty-year history of providing outstanding and cutting-edge special education programs, developed in response to current research and theory in both education and mental health. Our programs have a deep and unwavering commitment to improving the academic experiences, personal achievements, and future outlooks of our students. In accordance with the Illinois State Board of Education standards, we adhere to the highest academic and clinical standards in order to identify obstacles to learning, formulate goals, and execute treatment plans. To maintain our level of excellence, we are dedicated to partnering with parents, school districts, and outpatient providers, in order to provide a higher caliber of services. Our students develop skills for learning and life which carry them to their next level in life, whether that be a transition back to their community school environment or
