

I appreciate the communication and flexibility of the team in responding to initial referrals and getting families in the building.

Connections Day School has been a wonderful resource for our district for many years. The structure and therapeutic supports offered allow our students to overcome obstacles and meet their goals in a community of peers. From caring and supportive staff to extracurricular opportunities and special events, Connections goes above and beyond to offer students a positive school experience. Connections has a history of preparing our students to successfully return to their home schools and integrate into community and vocational settings. In addition, the staff are always willing to brainstorm creative solutions and partner with the district to best support students and their families."
