A. Purpose

The purpose of this policy is to set forth policies and guidelines for access to the Duluth Public Schools’ computer system and responsible and safe use of the Internet, including electronic communications.

B. General Statement of Policy

In making decisions regarding student and employee access to the Duluth Public Schools’ computer system and the Internet, including electronic communications, the school district considers its own stated educational mission, goals, and objectives. Electronic information research skills are now fundamental to preparation of citizens and future employees. Access to the school district computer system and to the Internet enables students and employees to explore thousands of libraries, databases, blogs, and other resources while exchanging messages with people around the world. The school district expects that faculty will promote responsible use of the school district computer system and the Internet throughout the curriculum and will provide guidance and instruction to students in their use.

C. Limited Forum for District’s Educational Use

The Duluth Public Schools is providing students and employees with access to the school district computer system, which includes Internet access. The purpose of the system is more specific than providing students and employees with general access to the Internet. The school district system has a limited educational purpose, which includes use of the system for classroom activities, educational research, and professional or career development activities. Users are expected to use Internet access through the district system to further educational and personal goals consistent with the mission of the school district and school policies. Uses which might be acceptable on a user’s private personal account on another system may not be acceptable on this limited-purpose network.

D. Use of System is a Privilege

The use of the Duluth Public Schools’ system and access to use of the Internet is a privilege, not a right. Depending on the nature and degree of the violation and the number of previous violations, unacceptable use of the school district system or the Internet may result in one or more of the following consequences: suspension or cancellation of use or access privileges; payments for damages and repairs; discipline under other appropriate school district policies, including suspension, expulsion, exclusion or termination of employment; or civil or criminal liability under other applicable laws.

Guidelines for Internet Access use are contained in Regulation 3187R.
