6130 HEALTH EDUCATION

The health education curriculum shall be consistent with the goals of education and shall include knowledge and skills for promotion of good health. It will be designed to strengthen the individual's self-awareness. It will provide students with information to enable them to make healthy decisions as they participate in their family and community.

Included in instruction will be health literacy. Health literacy is the capacity of an individual to obtain, interpret, and understand basic health information and services and the competence to use such information and services in ways, which are health-enhancing. Educational experiences to produce health literate students with the ability to be critical thinkers and problem-solvers, responsible and productive citizens, self-directed learners, and effective communicators will be the emphasis of the Health Education curriculum.

All faculty members will be informed of relevant facts pertaining to all facets of health education. Inservice programs will be established to help faculty be alert and informed of current information in relation to this area of study.

The School District recognizes that the first responsibility for the total health education of the child belongs to the parents. Yet, our society must be ready to accept its share of the responsibility. Steps shall be taken to ensure that the special knowledges, skills, interests, and responsibilities of the School District and related community agencies are recognized and utilized in the school's program of health education.

A Health Curriculum will include instruction in the six priority health risk behaviors identified by the Centers of Disease Control: Tobacco Use, unhealthy dietary behaviors, inadequate physical activity, alcohol and other drug use, sexual behaviors that may result in HIV infection, other sexually transmitted diseases, and unintended pregnancies, behaviors that may result in violence and unintentional injuries.
