

Why CLTCC?

Save money for at least two years and then transfer to a four-year college or university.

Start your career in two years or less.

Attend classes while living at home.

Enjoy smaller class sizes.

Louisiana is investing hundreds of millions of dollars into its community and technical colleges, including CLTCC, to align facilities with training needs and expand capacity.

These new state-of-the-art, high-tech, multi-use facilities will be used to educate and train over 220,000 Louisiana citizens for good-paying jobs in the 21st century workforce.

On average, for each bachelor's or professional degree, most states need three to four people earning technical certificates, technical diplomas and associate degrees in health care, manufacturing and processing, engineering, specialized construction and other fields.

If you still think of a community or technical college as a Plan B for higher education, think again!

CLTCC is now a two-year technical and community college offering certificates, technical diplomas and associate degrees in more than 20 programs to support local workforce development, prepare students for good-paying jobs and help students transition into four-year schools.

CLTCC serves eleven parishes in Central Louisiana
(Allen, Avoyelles, Catahoula, Concordia, Grant, LaSalle,
Natchitoches, Rapides, Sabine, Vernon and Winn) through
its nine campuses. CLTCC is operated under the Louisiana
Community & Technical College System, which is governed by
the Louisiana Board of Regents.

Dual Enrollment

Earn college and high school credits while still in high school through Dual Enrollment at CLTCC

"If you are planning to go to college, Dual Enrollment is the way to go because it allows you to get ahead and graduate from college sooner."

Terris Mason

Peabody Magnet High School - Alexandria, Louisiana
Industrial Manufacturing Technology Program
Certification for Manufacturing (C4M)

What is Dual Enrollment?

Dual Enrollment is a pathway that allows high school students to enroll in college courses while still in high school and receive college and high school credits at the same time.

The college credits that students earn can be used toward both a high school diploma and a college degree. Courses are taught at the high school by high school faculty certified to teach college courses, online by CLTCC faculty or at a CLTCC campus.

For example, a student can graduate from high school with CLTCC Dual Enrollment credits and use those credits to complete a Technical Competency Area, Certificate of Technical Studies, Technical Diploma or an associate degree. Students taking general education courses listed on the Louisiana Board of Regents Articulation Matrix can transfer those credits to any public Louisiana college or university.

What are some of the benefits of Dual Enrollment?

- Enroll in college courses taught at your high school, online or at CLTCC
- Receive instruction from high school teachers who meet technical or community college certification requirements
- Earn college credits while taking high school courses and apply those credits toward a technical certificate, technical diploma or associate degree
- Transition from high school to college more easily
- Lower college expenses by reducing the amount of time spent in college
- Access college resources and services such as advising, career counseling and mentoring
- Expedite entry into the workforce (start earning real money sooner)
- Take general education courses listed on the Louisiana Board of Regents Articulation Matrix and transfer those credits to any public Louisiana college or university.
- Meet college entrance requirements by completing developmental coursework prior to high school graduation

What are the requirements to participate in Dual Enrollment?

Each high school determines its minimum participation criteria. Students must meet the admission standards of the college awarding the credit. Admission standards vary among technical and community colleges. Students participating in Dual Enrollment through CLTCC:

- Must have taken either the PLAN, ACT or SAT assessment with scores on file at the high school
- Must be in good standing as defined by the high school
- Must have permission from the high school administration
- Must have permission from parents/guardian (to be obtained by school board district)
- Must meet CLTCC enrollment criteria

How many college credits can you earn?

Through Dual Enrollment, high school students, on average, earn 24 CLTCC credits or more before graduating.

What College-Level Programs are available through Dual Enrollment?

	Alexandria	Cottonport	Ferriday	Jena	Leesville	Many	Natchitoches	Oakdale	Winnfield
A/C & Refrigeration	X						X		
Automotive Technology					X				
Business Office Administration	X	X	X	X	X		X		X

Where, How & Can I afford it?

"I saved at least \$3,500 in college expenses thanks to Dual Enrollment. By taking welding courses while I was in high school, I finished the Welding Program about six months ahead of schedule."

Dustin Deshotel

Former Dual Enrollment Student
Welding Program at CLTCC

Where do I take my courses?

Course can be taken at the student's high school if available, online or at a CLTCC campus.

How do you enroll?

High school students seeking Dual Enrollment at CLTCC should consult with their high school counselor to select classes for enrollment. Additional applications may be required depending on the students' courses and TOPS Tech Early Start Requirements.

How much does it cost?

The fees for Dual Enrollment are substantially lower than normal tuition. The cost to participate in Dual Enrollment is based on the partnership CLTCC has with your school district.

Students taking courses at CLTCC are required to pay additional fees not covered by tuition (e.g., parking tag, ID card, etc.).

Do we have to purchase textbooks?

You may or may not be required to purchase textbooks. It will depend upon your program of study. Your cost for textbooks, if any, is based on the partnership CLTCC has with your school district.

Is financial aid available?

CLTCC administration will work with high schools to determine funding sources for Dual Enrollment students.

Are any scholarships available?

CLTCC will work with your school district to determine if any scholarship funding is available. Any available funding will be utilized to lower program costs for eligible students.
