

TECHNOLOGY USE

Student Personal Information Web Procedures

We encourage teachers and students to publish student original work, photos and video to the Chelsea School District website. The procedures to do this are outlined below. If a parent or guardian is opposed to the use of their student's work or photos on the Internet, they must inform the school district in writing before the start of each school year. The Chelsea School District will not publish to the Internet any information that you or your student does not wish to have published.

Safeguards

- Personal information (full names, addresses, phone numbers, etc.) about students will not be included in web pages.
- Only first names will be used unless the parent/guardian grants written permission to use a student's full name.
- Student original work may be published unless there is written request not to do so by the parent or guardian.
- Individual or group pictures (photos and/or video) of students may appear on the district web site
