

Principal's Message

February 16, 2021

Greetings,

This message highlights the release of our Honor and High Honor Roll as well as the release of our 2021-2022 Program of Studies.

Congratulations to those students who have obtained Honors and High Honors distinction. Your hard work and commitment to your studies and learning are evident in your habits of preparation and practice, your participation and engagement in the learning process and your ability to demonstrate mastery. Great job!

Our return to school after Winter Break will include the course selection and registration process for the 2021-2022 school year. Course selection is an important and impactful decision for our students and we remind them that their process should include much thought and consideration as well as much discussion with their teachers, school counselor and parents / guardians.

Over the three weeks until Course Selection in Mid March, students will have a variety of opportunities to think about, discuss and gather information to allow them to be best informed for their course selections.

We provide the Program of Studies as an important first step in students choosing their courses with an eye toward future planning of post secondary education or career / employment opportunities. Students, based on grade level, will choose their classes based on graduation requirements and academic electives. Students should consider future ambitions as well as interests and passions as they select their courses.

Have a fun, healthy and safe Winter Vacation!
