

Summer Academy at UVM

For an immersive learning experience this summer, encourage your high school students to explore the opportunities available through the University of Vermont!

Our 4-week, academically rigorous, and fully online [Summer Academy](#) courses are designed exclusively for students who have completed 10th, 11th, or 12th grade and are tailored to provide an in-depth exploration of a specific field of study in subjects ranging from journalism and photography to health and medicine.

What's more, *all* summer Pre-College programs at UVM (including our courses below) are offered to out-of-state students at **50% off academic year tuition rates**.

[Summer Academy Courses Include:](#)

- **Adventures in Neuroscience**
- **Biomedical Science and Human Disease**
- **Drones for Environmental Mapping**
- **Facing Environmental Futures**
- **Health and Medicine**
- **Storytelling with Photographs**

"I really enjoyed taking the Health & Medicine Summer Academy course. Despite everything being online and not being able to meet everyone in person and be more hands-on, I feel like everyone tried their best to make the online experience worth it. We still had guest speakers, demonstrations, and tours of the labs. I learned so much not only about how COVID-19 affects the body at the cellular level, but also about the many different medical career options. Taking this class helped me to sort out what path I think I want to take in the medical field as well as it made me very excited for my future!"

– Anonymous, Health and Medicine

[Summer Pre-College Courses at UVM - Registration is Open!](#)

High school students are invited to take college courses for credit throughout the year at UVM.

Our entry-level courses—ranging from Art History to Wildlife Biology—are appropriate for high school students and UVM's small class sizes are perfect for interacting with faculty. Offered on campus, online, and in hybrid learning formats, UVM's courses provide an incredible opportunity for high school students to meet their academic goals.

Registration is open now! Encourage your students to explore some of these courses we've hand-selected just for you.

- [Drawing](#)
- [American Sign Language](#)
- [Personal Finance & Investing](#)

- [Introduction to Sociology](#)

Join us Tuesday, Tuesday, March 2, 2021 7:00 PM EST - 7:30PM EST. for our Summer Academy: College Prep for Health and Medicine webinar.

We will be joined by:

- **Paula Tracy Ph.D.** - Professor in the Department of Biochemistry at the Robert Larner, M.D. College of Medicine at The University of Vermont
- **Hannah Sher** - York Prep High School in NYC
- **Charles Parfet** - Enrollment Coach for the Department of Continuing and Distance Education at UVM

During UVM Summer Academy Health and Medicine course students explore the fascinating world of modern medicine and bioscience through the lens of COVID-19 in online labs, lectures, demonstrations and virtual visits. Experts from across disciplines

at UVM and Robert Larner College of Medicine including public health, global health, genomics, general medicine, nursing, and allied health practice all engage with students with current developments in their fields.

The 4-week online program helps students discover their interests, learn about the latest advances in bioscience and molecular medicine, and develop an understanding of diverse medical and health science career paths that might be right for them.

Warm regards,
The UVM Continuing and Distance Education Team
