

[Looking Forward to the 2019/2020 School Year!](#)

We have secured funding and will move forward with the following projects:

- *3M Safety Window Film Installation.*
 - This safety film will be installed on all the exterior windows at the high school and elementary school. Some interior windows in the elementary school will be coated as well. Please see the link to the 3M website in the “Safety Information and Links” section of this page for more information on the product.

- *New Entry Doors to the Jr/Sr High School Office.*
 - We are changing the doors that lead to the Jr/Sr High School main office and adding a card reader and electronic door strikes. This will allow for safer access to the office and main hallways of the high school. We are also changing the way the doors off the main hallway open to the outside in order to provide an easier egress for students with mobility issues.

- *Bus Stop Arm Camera.*
 - We will equip all corporation owned buses with forward and rear facing Stop-Arm camera. Please see the link to the Pro-Vision website in the “Safety Information and Links” section of this page for more information on the product.

- *New High School Student Drop-Off Traffic Flow.*
 - Over the summer we will change the driveway in front of the high school into a one-way drive headed **south**. This will provide a smoother flow of traffic during drop-off and pick-up times.
