

Dear Parents and Guardians,

We have had a successful month of modified athletic activities. Our student athletes have met every expectation that has been set forth. At this time, we are looking to take a step forward to help our teams prepare for upcoming regular seasons. Based on the CIF modified sport calendar, our girls'/boys' volleyball and cross-country teams are scheduled to begin competitions in December. As we prepare for the potential start of those seasons, we want to take the opportunity to help develop team concepts and identity. Progressing to a phase 2 plan by increasing our modified workouts to small groups of eight students or less will help achieve this.

At this time, we will not conduct full team practices. However, working in small groups will allow coaches to implement team strategy that can be used when in competition. Based on LA County Public Health guidelines, small groups are permitted. These groups will be stable cohorts until we move forward to the next phase. Each coach will reach out by November 15 with specific information on the structure of groups.

Sincerely,

Brandon Lincoln
Athletic Director
