

HAZARDOUS WALKING/CROSSINGS AREAS

Policy 752
(formerly EEA-R-1)

In accordance with state law, the Board of Education follows developed procedures for determining hazardous student pedestrian crossings or areas. The formula which takes a number of variables into consideration is used to determine each area that is declared to be hazardous.

If a crossing or area is determined to be hazardous, students are provided transportation or an adult crossing guard, at school district expense, to and from school. Crossings/areas that are declared hazardous will be reviewed periodically.

Crossings and roads have been declared hazardous by the Eau Claire County Sheriff's Office in accordance with the established formula. These areas are reviewed periodically to determine if they still qualify. As a result of this action, many students who live less than one or two miles from school are transported. It is important that accurate records be kept for those students so that proper reporting to the Department of Public Instruction can be made for state aid purposes.
