

SPECIAL EDUCATION
School Board Report
April 9, 2018

- Our unfilled positions list is quickly shrinking! What a great feeling! Our current openings are for two special ed techs at PCS. And that's it!
- At the Professional Development Day on 3/16, the Special Education Staff had a training with Michael O'Pouda, Special Ed Consultant from Drummond Woodsum on Data Guided IEP Development. It was an engaging and thought-producing training.
- Our Unified Basketball team made it to two playoff games but were thwarted in their attempt for the Gold Ball! What a season of great growth and commitment by our players.
- In May we hold transition meetings with Child Development Services to plan for services for 2018-2019 incoming kindergarteners. We love the opportunity to meet the students and their families and create a seamless transition for their special education services.
- Our Special Education Team Leader team is working on Standard Operating Procedure manuals for special education teachers, as well as developing a user-friendly District-wide behavior plan.
