

Special Education Board Report December 10, 2018

- Not much to report since the November Board report. We are busy with our regular meetings and evaluations as well as being immersed in the audit and beginning to build the budget for FY2020.
- We have had no applications for ed techs in the last month. I know other schools, including out of district placements, are also struggling with hiring. This has made it impossible for us to place a student out of district who needs that level of support. It is so important that we work as a District to figure out how to attract, hire and retain staff.
