Sparta Area School District

Article 545 – Summer School Transportation

Wisconsin school districts are not required to provide summer school transportation. The Sparta Area School District elects to provide transportation to some, but not all students as described in this policy and as allowed by statute.

On days when summer school is in session, the District will pick up students at Cataract School, the Leon Community Center and a single designated site at Fort McCoy for transportation to district schools serving as summer school sites. At least seven students must be scheduled for transportation from a site before the district will commit to the transportation. If ridership consistently falls below seven students, the Supervisor of Transportation, in consultation with the Director of Business Services, may discontinue transportation to and from that site or make alternate arrangements.
