

MIKE BURZUMATO

Springs Coast Environmental Center

– “At Springs Coast EEC, Mike Burzumato not only drives the bus for every student coming on a field trip each day, but he guides students on exciting activities while they are here! I think his great contribution is his alter personalities while he is engaging students. He is a Recycle King during lunch, a River Rocker playing his guitar during the lesson about the aquifer and he is a puppet during the testing of second grade. So many hats and only one guy! He also does the ground work and building clean up with the staff. He goes above and beyond the job description every day and the kids respond to his excitement and enthusiasm. Mike is a creative and inspiring worker and Springs Coast EEC will never be the same.”
