Many of you have all been following the developing news about coronavirus (COVID-19). The health and safety of our students, staff, and communities remain a top priority for us. Our safety and health team is currently working behind the scenes to make sure that our emergency plans are up-to-date and to make any necessary adjustments to the plans based on any additional guidance we receive from the Health Department. We are actively communicating with the Colorado Department of Public Health & Environment (CDPHE) and our local Health Department about the Coronavirus (COVID-19). Thankfully, we do not have any known cases of the Corona virus in Colorado as of today (March 3).

However, the District is still taking this health threat very seriously. The District will continue with our school health plan and prevention practices including sending students home who are not feeling well, reminding students and staff to wash their hands often and cover their mouth if they sneeze or cough, and regularly disinfecting schools during and after school hours. We are also asking that parents **do not send your child to school if they may be sick**. Keeping your sick child home will be a great benefit for the health and wellness of all students and staff. We are also asking that staff stay home if they are sick. Please read the link on [“How Sick is Too Sick”](#).

The district will share any updates or relevant information with parents and the community as it becomes available. At this time, we are monitoring the situation but are not aware of any known Corona virus cases in our state or our area.

Please visit the Colorado Department of Health and Environment for more information and please reach out to the Superintendent’s Office with any questions or concerns.
