

# Post It Notes

December 3, 2012

## Concerns

1. "Values" are too important to rush through in an hour. We spent more time looking at data. Frustrating!
2. An article written by a graduate of the 2012 class was posted, "New ACT Policies Implemented" by Shelby Ostergaard (see attached). The committee member thought the article reflected what needs to be looked at in the school culture. If you are not an exceptional, brilliant student, what is your place at OPRFHS.

## Positives

## Questions

1. Does a value preclude any form of action?
2. Outreach to community groups.
  - a. Parenthesis
  - b. Hephzibah
  - c. IMPACT
  - d. PADS
  - e. Parents from 8 to 9 Summer Program
3. Strategic Planning for the facilities – why is that conversation taking place prior to value statements and strategic thrusts are developed?
4. I received an invite to facilities planning focus group at the high school. Why is that separate from the overall strategic planning process?

## Ideas

1. Would like to look at technology as a theme.
2. In order to increase participation in the survey from minority parents, we must contact them directly. A mass mailing will not increase participation.
