

## Big Hollow School District 38

### CDC Indicators and Thresholds for Community Transmission

Indicator	Low Transmission	Moderate Transmission	Substantial Transmission	High Transmission	Current Status Lake County *** (4/16/21)
<b>Incidence Rate:</b> Total new cases per 100K persons in the last 7 days*	0-9	10-49	50-99	100 or greater	<b>123.04</b>
7 Day Average Test Positivity Rate **	Less than 5%	5.0% - 7.9%	8.0% - 9.9%	Greater than 10%	<b>3.5</b>

\*Total number of new cases per 100,000 persons within the last 7 days is calculated by adding the number of new cases in the county in the last 7 days divided by the population in the county and multiplying by 100,000.

\*\*Percentage of positive diagnostic and screening tests during the last 7 days is calculated by dividing the number of positive tests in the county during the last 7 days by the total number of tests resulted over the last 7 days.

\*\*\*If the two indicators suggest different levels, the actions corresponding to the higher threshold should be chosen, per CDC guidance. Additionally, the CDC recommends mitigation strategies and transitions to full in-person instruction should only be relaxed or lifted after improvements are documented continuously for several weeks, such as decreasing to moderate from substantial levels.
