## General Updates, Recent & Upcoming Maintenance Events:

- **Bahia Sod – March Fertilization Guidelines:** Apply a complete fertilizer based on current soil test results. Include a pre-emergent herbicide (Pre-M) at a rate not exceeding 1 lb. of nitrogen per 1,000 sq. ft. The fertilizer must contain no less than 50% slow-release nitrogen to ensure steady nutrient availability and reduce surge growth.
- **St. Augustine Sod – March Fertilization Guidelines:** Apply a complete fertilizer based on current soil test results. Include a pre-emergent herbicide (Pre-M) at a rate not exceeding 1 lb. of nitrogen per 1,000 sq. ft. The fertilizer must contain a minimum of 50% slow-release nitrogen to promote steady, sustainable growth and reduce nutrient leaching.
- **Shrub, Tree & Groundcover Fertilization – March Guidelines:** Apply a complete fertilizer (formula determined by current soil test results) at a rate of 4–6 lbs. of nitrogen per 1,000 sq. ft. per year. A minimum of 50% of the nitrogen must be in a slow-release form to ensure steady nutrient availability and promote healthy, sustained growth.
- **Palm Fertilization – March Guidelines:** Apply 1.5 pounds of 8N–2P<sub>2</sub>O<sub>5</sub>–12K<sub>2</sub>O + 4Mg fertilizer with micronutrients per 100 square feet of palm canopy. Requirements: 100% of the Nitrogen (N), Potassium (K), and Magnesium (Mg) must be in slow-release form. All micronutrients must be in water-soluble form to ensure proper uptake. Fertilizer should be broadcast evenly under the canopy dripline, keeping product at least 6 inches away from the palm trunk to prevent trunk damage and nutrient burn.

The following are action items for Pine Lake Landscaping to complete. Please refer to the item # in your response listing action already taken or anticipated time of completion. **Red text** indicates deficient from previous report. **Bold Red text** indicates deficient for more than a month. **Green text** indicates a proposal has been requested. **Blue** indicates irrigation. **Orange** text represents Staff and **bold, black, underlined** represents questions or information for the BOS.

1. **Crater & Lakemont (West Side):** The recent cold snap caused significant stress to the plants, but please be patient over the next couple of weeks as temperatures warm up. With improved weather, the plants should naturally shed their browned, damaged leaves and begin producing healthy new growth. (Pic 1>)

2. **Lakemont Entrance:** Fortunately, I am seeing new green stems emerging from the ground on the gold mounds, which is a great sign of recovery.

# Lakemont Dr, Pond 3

**3. Pond 3/Lakemont:** The planting beds south of Pond 3 took a big hit, especially the gold mounds. I also noticed a vine growing over the shrubs. It is currently dormant but will begin to take over again once temperatures rise. Please clean out the beds and remove any unwanted plant material so the shrubs have space to recover as the weather warms. (Pic 3)

**4. Pond 3/Lakemont (West Side):** It looks like the crews trimmed back the lilies but did not remove the dead foliage. These dead leaves need to be cut out to give the new growth adequate space and light to leaf out properly. Clearing out the old material will help the lilies recover more quickly as temperatures continue to warm. (Pic 4a, 4b>)

**5. Lakemont/Pond 3:** There are large bits of trash in the front planting beds. remove trash and debris during each visit, and continuing to collect fallen branches across the entire property, as many are still dropping due to the recent storms and cold stress.

**6. Freeze-Damaged Plant Material – Reminder:** As a reminder, all freeze damaged plant material should remain in place until at least mid-March. Leaving the damaged foliage provides protection for the plant’s crown and helps prevent further injury.

**7. Cool-Season Weed Control:** Now is an ideal time to spot-treat cool-season weeds, which are highly visible against the dormant Bahia turf. Treating them during this window ensures better control before spring green-up and helps prevent competition with the recovering turf.

**8. Crape Myrtles:** Do not forget to schedule the pencil-pruning of all Crape Myrtles up to a height of 15 feet.

**9. Pond 3:** At the base of one tree near Pond 3, there are signs of rotting wood. The tree currently shows no signs of canopy decline or additional stress, so it will continue to be monitored. (Pic 9>)

# Lakemont Dr, Hudson Ave

**10. Crotons:** The crotons in the front planting beds are showing clear signs of life. New leaves are beginning to emerge, which is an excellent indication that they are recovering well from the recent cold stress. (Pic 10)

**13. Spanish Moss:** Multiple trees at the main entrance, heavy moss accumulation. Beginning to weigh down branches. Crews should remove excess moss as needed. (Pic 13)

**11. Palm Fire Damage:** This area still has leftover debris from the palm fire, including old piping, driplines, and trash that must be removed. Also, when will this area receive a fresh layer of pine needles? (Pic 11a>, 11b>)

**12. Irrigation Near #11:** There are several exposed and possibly cut driplines. The irrigation system needs to be inspected as soon as possible. Exposed or cut lines must be repaired, buried, or secured. Please confirm when irrigation crews are expected on-site so this can be addressed promptly.

# Lakemont Dr

**14. Opoka Entrance:** Same issue as #13, large amounts of moss debris accumulating within the ligustrums, and dropping onto the bottlebrush shrubs. The median planting bed requires detailing. (Pic 14)

**16. Large Tree – Cold Weather Damage:** The large tree in the same field as #15 has clearly suffered cold weather damage. Please ensure the following tasks are completed: Remove all Spanish moss from the canopy to reduce weight and moisture retention on weakened limbs. Limb up any low-hanging branches along the sidewalk to maintain safe pedestrian clearance and prevent potential hazards. (pic 16)

**15. Large Field (Higgins/Lakemont):** Large dead patches of turf are becoming more noticeable with each visit. This decline appears to be worsening rather than stabilizing. What is the plan for turf recovery? A clear action plan is needed, including: Identification of the cause (cold damage, disease, pests, irrigation issues, or soil conditions). Proposed recovery steps (treatments, cultural practices, or sod replacement). Timeline for corrective action. Monitoring plan to prevent further decline. (Pic 15)

**17. Loropetalum:** During my inspection, I did see that the loropetalum shrubs are flowering and already have new leaves starting to bud. (Pic 17)

**18. Monument Planting Bed – Lakemont:** A large tuft of ornamental grass is no longer rooted in the ground and is now sitting on top of the soil. Action Required:...(Nxt Pg)

# Lakemont Dr, Hudson Ave, Opopka St

**(#18 Cont.)**.... Remove the loose ornamental grass tuft. Detail the planting bed, clearing debris, edge all bed lines to restore clean, defined borders and improve overall appearance. (Pic 18)

**20. Schefflera Shrubs – Freeze Damage:** Throughout the property, nearly all of the Schefflera shrubs have been heavily damaged by the recent freezing temperatures. Although they currently look unsightly, do not trim them at this time. I strongly recommend leaving all damaged growth in place until at least mid-March. This old growth provides protection to the plant's living tissue and helps prevent further cold injury. Once warmer weather stabilizes, crews can trim back the dead material and shape the shrubs for recovery.

**21. Crinum Lilies – Freeze Damage:** The Crinum lilies are exhibiting the typical symptoms of freeze damage. Because their leaves have a naturally soft, fleshy texture, they tend to collapse, turn brown, and appear withered after exposure to freezing temperatures. Just like the other cold-sensitive plants on site, leave all damaged foliage in place until at least mid-March. This protects the plant's crown and prevents additional stress if another cold snap occurs. Once temperatures stabilize, the dead foliage can be safely removed, and the lilies should begin pushing fresh new growth.

**22. Opoka & Hudson:** It appears that at the Opoka and Hudson area, the crew may have attempted to break down fallen.... **(Nxt Pg)**

**19. Same Area as Above:** The alliums can be cut back at anytime. They are very winter hardy and can be cut to the ground. Next detailing day identify the area and trim the stocks for the onions. (Pic 19a. 19b>)

# Opopka St

**(#22 Cont.)**.... branches by running over them with a mower. Pick up all larger branches before or after mowing to prevent equipment damage and maintain a clean appearance. Rake the smaller stems and chips back into the planting beds where they can decompose naturally and help replenish organic matter. (Pic 22)

**24. Opoka Entrance Planting Beds:** The front planting beds at the Opoka entrance have wild geranium beginning to spread. This invasive growth needs to be removed before it overtakes the shrubs and groundcover. (Pic 24)

**23. Palm Debris:** The palm boots that have fallen need to be cleaned up on the next visit. These should be removed from the beds and turf areas to maintain a clean appearance and prevent buildup around the palm bases. (Pic 23)

**25. Cypress Trees – Moss Removal:** The cypress trees near the large Wetland (C) need to be de-mossed soon. With leaf-out approaching, it is important to clear the canopy (up to 15 feet) to reduce weight, improve air flow, ensure the trees can push healthy new growth, and promote a fuller, healthier canopy. (Pic 25)

# Compliance Audit Overview

The Community Website Compliance Audit (CWCA) consists of a thorough assessment of Florida Community Development District (CDD) websites to assure that specified district information is available and fully accessible. Florida Statute Chapter 189.069 states that effective October, 2015, every CDD in the state is required to maintain a fully compliant website for reporting certain information and documents for public access.

The CWCA is a reporting system comprised of quarterly audits and an annual summary audit to meet full disclosure as required by Florida law. These audits are designed to assure that CDDs satisfy all compliance requirements stipulated in Chapter 189.069.

## Compliance Criteria

The CWCA focuses on the two primary areas – website accessibility as defined by U.S. federal laws, and the 16-point criteria enumerated in [Florida Statute Chapter 189.069](#).

### ADA Website Accessibility

Several federal statutes (American Disabilities Act, Sec. 504 and 508 of the Rehabilitation Act of 1973) require public institutions to ensure they are not discriminating against individuals on the basis of a person's disability. Community websites are required to conform to web content accessibility guidelines – [WCAG 2.1](#), which is the international standard established to keep websites barrier-free and the recognized standard for ADA-compliance.

## Florida Statute Compliance

Pursuant to F.S. [189.069](#), every CDD is required to maintain a dedicated website to serve as an official reporting mechanism covering, at minimum, 16 criteria. The information required to report and have fully accessible spans: establishment charter or ordinance, fiscal year audit, budget, meeting agendas and minutes and more. For a complete list of statute requirements, see page 3.

## Audit Process

The Community Website Compliance Audit covers all CDD web pages and linked PDFs.\* Following the [WCAG 2.1](#) levels A, AA, and AAA for web content accessibility, a comprehensive scan encompassing 312 tests is conducted for every page. In addition, a human inspection is conducted to assure factors such as navigation and color contrasts meet web accessibility standards. See page 4 for complete accessibility grading criteria.

In addition to full ADA-compliance, the audit includes a 16-point checklist directly corresponding with the criteria set forth in Florida Statute Chapter 189.069. See page 5 for the complete compliance criteria checklist.

\* **NOTE:** Because many CDD websites have links to PDFs that contain information required by law (meeting agendas, minutes, budgets, miscellaneous and ad hoc documents, etc.), audits include an examination of all associated PDFs. **PDF remediation** and ongoing auditing is critical to maintaining compliance.

# Accessibility overview

## Everyone deserves equal access.

With nearly 1-in-5 Americans having some sort of disability – visual, hearing, motor, cognitive – there are literally millions of reasons why websites should be fully accessible and compliant with all state and federal laws. Web accessibility not only keeps board members on the right side of the law, but enables the entire community to access all your web content. The very principles that drive accessible website design are also good for those without disabilities.

Sight, hearing, physical, cognitive.

## The legal and right thing to do

Several federal statutes (American Disabilities Act, Sec. 504 and 508 of the Rehabilitation Act of 1973) require public institutions to ensure they are not discriminating against individuals on the basis of a person's disability. Community websites are required to conform to web content accessibility guidelines, WCAG 2.1, the international standard established to keep websites barrier-free. Plain and simple, any content on your website must be accessible to everyone.

# ADA Compliance Categories

Most of the problems that occur on a website fall in one or several of the following categories.

## Contrast and colors

Some people have vision disabilities that hinder picking up contrasts, and some are color blind, so there needs to be a distinguishable contrast between text and background colors. This goes for buttons, links, text on images – everything. Consideration to contrast and color choice is also important for extreme lighting conditions.

*Contract checker:* <http://webaim.org/resources/contrastchecker>

## Using semantics to format your HTML pages

When web page codes are clearly described in easy-to-understand terms, it enables broader sharing across all browsers and apps. This 'friendlier' language not only helps all the users, but developers who are striving to make content more universal on more devices.

## Text alternatives for non-text content

Written replacements for images, audio and video should provide all the same descriptors that the non-text content conveys. Besides helping with searching, clear, concise word choice can make vivid non-text content for the disabled.

*Helpful article:* <http://webaim.org/techniques/alttext>

## Ability to navigate with the keyboard

Not everyone can use a mouse. Blind people with many with motor disabilities have to use a keyboard to make their way around a website. Users need to be able to interact fully with your website by navigating using the tab, arrows and return keys only. A “skip navigation” option is also required. Consider using [WAI-ARIA](#) for improved accessibility, and properly highlight the links as you use the tab key to make sections.

**Helpful article:** [www.nngroup.com/articles/keyboard-accessibility](http://www.nngroup.com/articles/keyboard-accessibility)

**Helpful article:** <http://webaim.org/techniques/skipnav>

## Easy to navigate and find information

Finding relevant content via search and easy navigation is a universal need. Alt text, heading structure, page titles, descriptive link text (no ‘click here’ please) are just some ways to help everyone find what they’re searching for. You must also provide multiple ways to navigate such as a search and a site map.

**Helpful article:** <http://webaim.org/techniques/sitetools/>

## Properly formatting tables

Tables are hard for screen readers to decipher. Users need to be able to navigate through a table one cell at a time. In addition to the table itself needing a caption, row and column headers need to be labeled and data correctly associated with the right header.

**Helpful article:** <http://webaim.org/techniques/tables/data>

## **Making PDFs accessible**

PDF files must be tagged properly to be accessible, and unfortunately many are not. Images and other non-text elements within that PDF also need to be ADA-compliant. Creating anew is one thing; converting old PDFs – called PDF remediation – takes time.

*Helpful articles:* <http://webaim.org/techniques/acrobat/acrobat>

## **Making videos accessible**

Simply adding a transcript isn't enough. Videos require closed captioning and detailed descriptions (e.g., who's on-screen, where they are, what they're doing, even facial expressions) to be fully accessible and ADA compliant.

*Helpful article:* <http://webaim.org/techniques/captions>

## **Making forms accessible**

Forms are common tools for gathering info and interacting. From logging in to registration, they can be challenging if not designed to be web-accessible. How it's laid out, use of labels, size of clickable areas and other aspects need to be considered.

*Helpful article:* <http://webaim.org/techniques/forms>

## **Alternate versions**

Attempts to be fully accessible sometimes fall short, and in those cases, alternate versions of key pages must be created. That is, it is sometimes not feasible (legally, technically) to modify some content. These are the 'exceptions', but still must be accommodated.

## **Feedback for users**

To be fully interactive, your site needs to be able to provide an easy way for users to submit feedback on any website issues. Clarity is key for both any confirmation or error feedback that occurs while engaging the page.

## **Other related requirements**

### ***No flashing***

Blinking and flashing are not only bothersome, but can be disorienting and even dangerous for many users. Seizures can even be triggered by flashing, so avoid using any flashing or flickering content.

### ***Timers***

Timed connections can create difficulties for the disabled. They may not even know a timer is in effect, it may create stress. In some cases (e.g., purchasing items), a timer is required, but for most school content, avoid using them.

### ***Fly-out menus***

Menus that fly out or down when an item is clicked are helpful to dig deeper into the site's content, but they need to be available via keyboard navigation, and not immediately snap back when those using a mouse move from the clickable area.

### ***No pop-ups***

Pop-up windows present a range of obstacles for many disabled users, so it's best to avoid using them altogether. If you must, be sure to alert the user that a pop-up is about to be launched.

Specifically, the duties, obligations, and responsibilities of Contractor are to provide the materials, equipment, services, and supervision necessary to perform the Work.

- B.** Contractor shall be solely responsible for the means, manner and methods by which its duties, obligations and responsibilities are met to the satisfaction of the District and in accordance with this Agreement. While providing the Work, Contractor shall assign such staff as may be required, and such staff shall be responsible for coordinating, expediting, and controlling all aspects to assure completion of the Work. complete the Work in accordance with this Agreement.

### SECTION 3. COMPENSATION.

However, no additional services shall be provided by Contractor prior to the Parties’ successful negotiations of the additional terms and compensation. Upon successful negotiations, the Parties shall agree in writing to an addendum, addenda, or change order(s) to this Agreement. Contractor shall be compensated for such agreed upon additional services upon mutual terms agreeable to the Parties and agreed to in writing.
- D. The District may require, as a condition precedent to making any payment to Contractor, that all subcontractors, material men, suppliers or laborers be paid and require evidence, in the form of Lien Releases or partial Waivers of Lien, to be submitted to the District by those subcontractors, material men, suppliers or laborers, and further require that Contractor provide an Affidavit relating to the payment of said indebtedness. Further, the District shall have the right to require, as a condition precedent to making any payment, evidence from Contractor, in a form satisfactory to the District, that any indebtedness of Contractor, as to services to the District, has been paid and that Contractor has met all of the obligations with regard to the withholding and payment of taxes, Social Security payments, Workmen’s Compensation, Unemployment Compensation contributions, and similar payroll deductions from the wages of employees.

**SECTION 4. ACCEPTANCE OF THE WORK.** Upon completion of the Work, Contractor shall notify the Engineer in writing via email to Brad Foran at [bforan@lighthouseenginc.com](mailto:bforan@lighthouseenginc.com) that the Work has been completed. If the Engineer determines there are deficiencies in the Work, the

Engineer shall notify Contractor of such deficiencies and the deficiencies shall be promptly remedied by Contractor. Upon determination by the Engineer that all deficiencies have been remedied, the Work shall be deemed to be accepted.

**SECTION 5. TERM AND TERMINATION.**

- A. *Term.*** This Agreement shall become effective as of the date first written above and shall terminate upon completion of the Work set forth herein and described in any amendment hereto, unless terminated in accordance with the terms of this Agreement.
- B. *Termination.*** The District agrees that Contractor may terminate this Agreement for cause by providing thirty (30) days' written notice of termination to the District; provided, however, that the District shall be provided a reasonable opportunity to cure any failure under this Agreement. Contractor agrees that the District may terminate this Agreement immediately for cause by providing written notice of termination to Contractor. The District shall provide fifteen (15) days' written notice of termination without cause. Upon any termination of this Agreement, and as Contractor's sole and exclusive remedy for any termination hereunder, Contractor shall be entitled to payment for all Work rendered up until the effective termination of this Agreement, subject to whatever claims or off sets the District may have against Contractor.

**SECTION 6. WARRANTY.** Contractor warrants to the District that all materials furnished under this Agreement shall be new, and that all Work and materials shall be of good quality, free from faults and defects. Contractor shall assign to all manufacturer warranties for materials purchased for purposes of this Agreement to the District upon completion of the Work. Contractor hereby warrants all services and workmanship for one (1) year from acceptance of the Work, provided that this warranty shall not apply to damages caused by acts of God or interference by third parties. Neither final acceptance of the Work, nor final payment therefore, nor any provision of this Agreement shall relieve Contractor of responsibility for defective or deficient materials or services. If any of the Work provided under this Agreement are found to be defective, deficient or not in accordance with the Agreement, including specifically all design services contemplated and/or provided hereunder, Contractor shall correct, remove and/or replace such services and/or materials promptly after receipt of a written notice from the District and to correct and pay for any other damage resulting therefrom to District property or the property of landowners within the District such that the District receives the maximum benefit of the completed Work contemplated by this Agreement.

Contractor hereby covenants to the District that it shall perform the services necessary to complete the Work: (i) using its best skill and judgment and in accordance with generally accepted professional and design standards and practices for projects of similar design and complexity as the development occurring within the District; (ii) in compliance with all applicable federal, state, county municipal, building and zoning, land use, environmental, public safety, non-discrimination and disability accessibility laws, codes, ordinances, rules and regulations, including, without limitation, all professional registration (both corporate and individual) for all required basic disciplines that it shall perform; and (iii) in an expeditious and economical manner consistent with the best interest of the District. Contractor shall furnish the District with a Certificate of Insurance evidencing compliance with this requirement prior to commencing the Work. No certificate shall be acceptable to the District unless it provides that any change or termination within the policy periods of the insurance coverage, as certified, shall not be effective within thirty (30) days of prior written notice to the District. Insurance coverage shall be from a reputable insurance carrier, licensed to conduct business in the State of Florida, shall be considered primary and non-contributory with respect to the Additional Insureds, and shall be endorsed to provide for a waiver of underwriter’s rights of subrogation in favor of the Additional Insureds.

**C.** If Contractor fails to have secured and maintained the required insurance, the District has the right but not the obligation to secure such required insurance in which event Contractor shall pay the cost for that required insurance and shall furnish, upon demand, all information that may be required in connection with the District’s obtaining the required insurance.

**SECTION 8. INDEMNIFICATION.**

**A.** To the fullest extent permitted by law, and in addition to any other obligations of Contractor under this Agreement or otherwise, Contractor shall indemnify, hold harmless, and defend the District and its officers, supervisors, agents, managers, counsel, engineers, staff and representatives (together, “**Indemnitees**”), from all claims, liabilities, damages, losses and costs, including, but not limited to, reasonable attorney’s fees, to the extent caused, in part or in whole, by (i) the negligent, reckless,

or intentionally wrongful misconduct of Contractor, or any employee, agent, subcontractor, or any individual or entity directly or indirectly employed or used by any of them to perform any of the Work, (ii) Contractor's performance of, or failure to perform, Contractor's obligations pursuant to this Agreement or any Work or Contractor's performance of any activities in connection therewith, and (iii) any breach of any warranty, representation, covenant, or agreement made by Contractor in this Agreement or any Work.

- B. To the extent a limitation is required by law, the obligations under this section shall be limited to no more than One Million Dollars (\$1,000,000.00), which amount the District and Contractor agree bears a reasonable commercial relationship to this Agreement. Nothing in this section is intended to waive or alter any other remedies that the District may have as against Contractor.
- C. Obligations under this section shall include the payment of all settlements, judgments, damages, liquidated damages, penalties, forfeitures, back pay awards, court costs, arbitration and/or mediation costs, litigation expenses, attorneys' fees, paralegal fees (incurred in court, out of court, on appeal, or in bankruptcy proceedings), any interest, expenses, damages, penalties, fines, or judgments against the District. Nothing in this Agreement is intended to waive or alter any other remedies that the District may have as against Contractor. The provisions of this Section 8 are independent of, and will not be limited by, any insurance required to be obtained by Contractor pursuant to this Agreement or otherwise obtained by Contractor, and the provisions of this Section 8 survive the expiration or earlier termination of this Agreement with respect to any claims or liability arising in connection with any event occurring prior to such expiration or termination.
- D. Contractor shall ensure that all subcontracts related to the Work include this section for the benefit of the Indemnitees.

**SECTION 9. COMPLIANCE WITH GOVERNMENTAL REGULATION.** In performing its obligations under this Agreement, Contractor and each of its employees, agents, subcontractors or anyone directly or indirectly employed by Contractor shall comply with all applicable laws, ordinances, rules, regulations, and orders of any public or governmental authority having appropriate jurisdiction, including all laws, regulations and rules relating to immigration and/or the status of foreign workers. Contractor shall initiate, maintain, and supervise all safety precautions and programs in connection with its obligations herein. Contractor shall ensure that all of Contractor's employees, agents, subcontractors or anyone directly or indirectly employed by Contractor observe Contractor's rules and regulations of safety and conduct. Contractor shall take all reasonable precautions for the safety of and shall provide all reasonable protection to prevent damage, injury or loss to all its employees, agents and subcontractors performing its obligations herein and other persons who may be affected, and any material, equipment and other property. Contractor shall remedy all damage or loss to any property caused in whole or in part by Contractor, its employees, agents, subcontractors or anyone directly or indirectly employed by Contractor, or by anyone for whose acts Contractor may be liable. Contractor shall indemnify District for all damage or losses it may incur or be exposed to because of Contractor or any of its

employees, agents, subcontractors or anyone directly or indirectly employed by Contractor's failure to comply with the provisions contained herein.

**SECTION 10. LIENS AND CLAIMS.** Contractor shall promptly and properly pay for all labor employed, materials purchased, and equipment hired by it to perform under this Agreement. Contractor shall keep the District's property free from any materialmen's or mechanic's liens and claims or notices in respect to such liens and claims, which arise by reason of Contractor's performance under this Agreement, and Contractor shall immediately discharge any such claim or lien. In the event that Contractor does not pay or satisfy such claim or lien within three (3) business days after the filing of notice thereof, the District, in addition to any and all other remedies available under this Agreement, may terminate this Agreement to be effective immediately upon the giving of notice of termination.

**SECTION 11. LIMITATIONS ON GOVERNMENTAL LIABILITY.** Nothing in this Agreement shall be deemed as a waiver of the District's sovereign immunity or the District's limits of liability as set forth in section 768.28, *Florida Statutes*, or other law, and nothing in this Agreement shall inure to the benefit of any third party for the purpose of allowing any claim which would otherwise be barred under such limitations of liability or by operation of law.

**SECTION 13. INDEPENDENT CONTRACTOR.** It is understood and agreed that at all times the relationship of Contractor and its employees, agents, subcontractors or anyone directly or indirectly employed by Contractor to the District is the relationship of an independent contractor and not that of an employee, agent, joint venturer or partner of the District. Nothing in this Agreement shall be interpreted or construed as creating or establishing the relationship of employer and employee between the District and Contractor or any of its employees, agents, subcontractors or anyone directly or indirectly employed by Contractor. The Parties acknowledge that Contractor is not an employee for state or federal tax purposes. Contractor shall hire and pay all of Contractor's employees, agents, subcontractors or anyone directly or indirectly employed by Contractor, all of whom shall be employees of Contractor and not employees of District and at all times entirely under Contractor's supervision, direction and control.
