Water Feature and Lake Fountains Update: October, 2026

Lake Fountains:

FPC-A 7.5hp Fountain: Request for troubleshoot received, fountain reported to not be running.

- 10/15/26: Troubleshoot performed. Found overload tripped with a loss of continuity to motor, failed megger insulation testing as well. We scheduled for two technicians to return with a boat to be able to further test the motor and cable separately.
- 10/20/26: We returned to the site, separated the motor from the cable and tested them individually. The motor itself failed all tests and needs to be replaced. The submersible cable passed the insulation testing and should be ok to reuse (although visibly showing some signs of copper oxidization). The lights currently have 1 out of 6 working with signs of water intrusion.
- **Quote QU-0919** for repair includes replacement of the 7.5hp Pump, Motor and Motor Starter Box with the option of replacing the LED Light Kit.

MIT-1 7.5hp Fountain: Request for troubleshoot received, fountain reported to not be running.

- 10/23/26: Troubleshoot performed. Found the 2-pole breaker to be nuisance tripped at arrival. Reset the breaker and observed the fountain running under normal, acceptable parameters.

Floating Fountains Pending Work:

*Expected to be completed by 11/06/26

***Fountain #4:** 5hp Fountain Replacement

***Fountain #5:** 5hp Fountain Repair

***Fountain #6:** 7.5hp Fountain Repair

Water Feature Update: starts on the next page…

Roundabout Water Feature:

Repairs:

- Installation of a new contactor for the feature pump. - Completed on 10/14/26.

October Update:

- We consulted with some Commercial Pool Companies in the area to help better understand the problems of this feature and to come up with a solution based on its individual needs.
- The treatment schedule was immediately switched to 2x a week, with thorough testing and treatments being performed. Progress was showing by the end of the first week with the water quality and by weeks 2 and 3 we have gotten the feature looking great and the water has been more stable in between treatments.
- Throughout this month we have used our resources to determine exactly what this feature needs in order to be maintained at an acceptable level.
- The water feature needs to be maintained with 1-2 visits per week, with the filters being cleaned per visit and the water being treated per testing results.
- Updated Monthly Water Feature Maintenance Contract to reflect this is attached.

10/11/26 Water was dark green.	10/28/26 Water quality has drastically improved.
	

Water Feature Lights:

- The feature lights have not been operational, they have old wiring and water intrusion in the fixtures.
- **Quote QU-0918** is attached which includes the installation of (x20) Submersible RGBW Color-Changing LED Fountain Lights.

THIRD ORDER OF BUSINESS: BUSINESS MATTERS

A. District Engineer – *Jerry Whited, Brletic Dvorak Inc.*

Mr. Whited advised that the additional survey results were received and he will set up a Teams meeting with Mr. Beckett and Supervisor Silverstein to review the results. Supervisor Handrick, Jr. requested a copy of the survey results.

Discussion followed on the release of the maintenance bond for South Branch Blvd. Supervisor Abercrombie will ask Commissioner Starkey's office when the bond agenda is expected to be considered by Pasco County Board of County Commissioners.

B. EXHIBIT 1: Review of Field Services Requests/Responses (8/29 –9/30)

DRAFT

Supervisor Snyder spoke on the flooding concern at the townhomes, noting the District had no maintenance responsibility in the specified area.

C. EXHIBIT 2: Aquatic – *Chuck Burnite, GHS Environmental*

Mr. Burnite reviewed recent activities related to aquatic maintenance, and advised the SWFWMD report was submitted on October 3, and responded to Supervisor questions.

Discussion followed on a resident's request pertaining to maintenance of wetland setback. Mr. Burnite advised that typically the permit requires a setback to be left in its natural state, and any modifications to the area require SWFWMD permission and are limited to removal of nuisance, exotic species. Actions allowable under the District's Natural Area Maintenance Policy and Agreement were also discussed, and Mr. Burnite noted that the requester had previously paid for maintenance under the policy for an area behind their property.

1. Consideration of GHS Proposals

D. Wetlands/Conservation

This item was addressed out of order, after III.F. Fountains.

Mr. Penfield presented the fire management plan. He explained that 3.75 miles of 6'-wide fire lines in the interior are to be established, he recommended signage to notify hunters of prohibited practices on District property. He advised that 13 of the 20 units are within the mitigation areas, and with the type of habitats noted in the conservation area, they will require burning every 2-4 years. He touched on smoke issues that will be mitigated by utilizing expected seasonal wind patterns.

Mr. Penfield reviewed the history of the District's property, prior to development, and the findings during his crew's walk-through, and explained the reasoning for the unit size (fuel loading, habitat, the drainage system, and the practical impact of smoke). He explained the impact of some of the noted invasive, exotic vegetation: Cogon grass, Chinese Tallow and, closer to the development, Brazilian Pepper (which will need a combined fire and herbicide treatment plan). He recommended burning approximately 1/3 of the total property per year, with a 2-5 year rotation, resulting in less intense fires for the following years due to reduction and containment of fuel load.

Mr. Penfield advised obtaining permission from neighboring developments to allow limited fire encroachment when the perimeter units are consideration, with a potential cost-share for the portion of neighboring property that is incorporated in the unit ban.

DRAFT

Mr. Penfield explained mitigating factors for scheduling the burn schedule and the process of creating fire lines. Budgeting would be required for maintenance once the fire lines are created.

Mr. Penfield recommended scheduling a four-month burn-window after December for the initial burns, once the fire lanes are established, and creating an invasive plan to add herbicide to remaining plants and shoots follow up after a burn.

Mr. Penfield also discussed wildlife and hunting activity noted within the conservation area. Ms. Moczynski recommended posting information on the website and working with the HOA to distribute the information to residents regarding prohibited activities within the conservation/wetland areas. She can assist with drafting a letter to the neighboring communities regarding encroachment and prohibited activities.

Discussion moved to III.H. District Counsel, III.G. Field Manager, III.I. District Manager, and IV. CONSENT AGENDA, before returning to this item.

The mitigation credits were discussed. Ms. Moczynski will review previous communications regarding the District's options and who may be willing to work with the District on matter.

Board consensus was to prioritize burning units 2, 3, 4, 6, 7, 8, and 10., with units 4 and 3 required by SWFWMD, with unit 9 as an additional option.

Mr. Penfield will make arrangements to deliver the plan to Mr. Beckett, and draft proposals for the selected units.

Discussion moved to V. SUPERVISOR REQUESTS.

E. EXHIBIT 3: Landscape – *Rob Ferrante/Jacob Zucker, Cepra*

Mr. Zucker listed the various completed landscape projects, the in-progress activities, and the scheduled maintenance tasks. He explained an irrigation repair for which a proposal will be presented. Mr. Ferrante advised that any low-voltage landscape lighting at the front monument damaged by their maintenance equipment would be repaired.

Mr. Zucker discussed concept images and counts for replacing the Oleanders.

F. EXHIBIT 4: Fountains – *Kyle Roehm, Fountain Kings*

Mr. Roehm provided an update on the roundabout fountain, he affirmed there no leaks were found, the dead algae is gradually being filtered, the jets have been adjusted, and the auto-fill is operational but dependent on Pasco County's release of reclaimed water.

DRAFT

It was noted that water accumulation at the curb inlets was a designed collection point for all water run-off, not indicative of an issue with the water feature specifically.
