Estimated Budget: **Task 1:** Quarterly Berm Events @ \$850 per event - 4 Events
Task 2: Monthly Mitigation Maintenance @ \$3995 per event - 12 Events

Scope of Services:

Task 1 Quarterly Berm Vegetation Management – April 2026 thru March 2027:

- To promote the successful establishment of native vegetation and reduce competition from invasive species, Terra Crafters Environmental will implement a quarterly mowing program for the berm surrounding the mitigation pond **G14-2**. This service will complement ongoing herbicide treatments by limiting the spread of nuisance and invasive vegetation, reducing seed production, and maintaining a manageable vegetation height that supports ecological function. Mowing will be conducted with appropriate equipment to minimize soil disturbance and will be timed to align with seasonal growth patterns to maximize effectiveness.

Task 2 Monthly Mitigation Maintenance - April 2026 thru March 2027:

- Terra Crafters will maintain the mitigation areas (**M17-3, G14-1, G14-2**) for a period based on permit conditions. DATE: November __, 2026
TIME: _____ .m.
PLACE: Rizzetta & Company, Inc.
5844 Old Pasco Road, Suite 100

Each landowner may vote in person or by written proxy. Proxy forms may be obtained upon request at the office of the District Manager, Rizzetta and Company, Inc., 5844 Old Pasco Road, Suite 100, Wesley Chapel, Florida 33544, Ph: (813) 994-1001 ("**District Manager's Office**"). At said meeting, each landowner or his or her proxy shall be entitled to nominate persons for the position of Supervisor and cast one vote per acre of land, or fractional portion thereof, owned by him or her and located within the District for each person to be elected to the position of Supervisor. A fraction of an acre shall be treated as one acre, entitling the landowner to one vote with respect thereto. Platted lots shall be counted individually and rounded up to the nearest whole acre. The acreage of platted lots shall not be aggregated for determining the number of voting units held by a landowner or a landowner's proxy. At the landowners' meeting, the landowners shall select a person to serve as the meeting chair, who shall conduct the meeting.

The landowners' meeting and the Board meeting are open to the public and will be conducted in accordance with the provisions of Florida law. One or both of the meetings may be continued to a date, time, and place to be specified on the record at such meeting. A copy of the agenda for these meetings may be obtained from the District Manager's Office. There may be an occasion where one or more supervisors will participate by telephone.

Pursuant to Chapter 190, *Florida Statutes*, and after a Community Development District ("**District**") has been established and the landowners have held their initial election, there shall be a subsequent landowners' meeting for the purpose of electing members of the Board of Supervisors ("**Board**") every two years until the District qualifies to have its board members elected by the qualified electors of the District. The following instructions on how all landowners may participate in the election are intended to comply with Section 190.006(2)(b), *Florida Statutes*.

A landowner may vote in person at the landowners' meeting, or the landowner may nominate a proxy holder to vote at the meeting in place of the landowner. Whether in person or by proxy, each landowner shall be entitled to cast one vote per acre of land owned by him or her and located within the District, for each position on the Board that is open for election for the upcoming term. A fraction of an acre shall be treated as one (1) acre, entitling the landowner to one vote with respect thereto. For purposes of determining voting interests, platted lots shall be counted individually and rounded up to the nearest whole acre. Moreover, please note that a particular parcel of real property is entitled to only one vote for each eligible acre of land or fraction thereof; therefore, two or more people who own real property in common, that is one acre or less, are together entitled to only one vote for that real property.

At the landowners' meeting, the first step is to elect a chair for the meeting, who may be any person present at the meeting. The landowners shall also elect a secretary for the meeting, who may be any person present at the meeting. The secretary shall be responsible for the minutes of the meeting. The chair shall conduct the nominations and the voting. If the chair is a landowner or proxy holder of a landowner, he or she may nominate a candidate and make and second motions. The candidate must be nominated and then shall be elected by a vote of the landowners. Nominees may be elected only to a position on the Board that is open for election for the upcoming term.

This year, **one (1) seat** on the Board will be up for election by landowners. The candidate receiving the highest number of votes shall be elected for **a term of four (4) years**. The term of office for the successful candidate shall commence upon election.

A proxy is available upon request. To be valid, each proxy must be signed by one of the legal owners of the property for which the vote is cast and must contain the typed or printed name of the individual who signed the proxy; the street address, legal description of the property, or tax parcel identification number; and the number of authorized votes. If the proxy authorizes more than one vote, each property must be listed and the number of acres of each property must be included. The signature on a proxy does not need to be notarized.

COMMUNITY ASSET MANAGEMENT REPORT

April 02, 2026

Rizzetta & Company

Amiee Brodeen – Community Asset Manager

Rizzetta & Company
Professionals in Community Management

Summary, Wiregrass Ranch Blvd

General Updates, Recent & Upcoming Maintenance

- Irrigation Repairs: During each maintenance visit the crew lead should be noting all the broken irrigation heads, driplines, etc., for repair. Please be sure this is occurring.
- Trash and debris: Please ensure that all trash and debris are picked up and removed throughout the property each visit. I observed a pile of debris along the median—this should not be happening.

The following are action items for Sunrise and Hughes to complete. Please refer to the item # in your response listing action already taken or anticipated time of completion. **Red text** indicates deficient from previous report. **Bold Red text** indicates deficient for more than a month. **Green text** indicates a proposal has been requested. **Blue** indicates irrigation. **Orange** is for staff. **Bold underlined is info. or questions for BOS or Developer.**

- 1. Sunrise – Trash Debris:** Despite the crew servicing the site the day prior to the inspection, a significant amount of trash was scattered in the planting beds and some within the turf areas. Please remind the crew that all planting beds and turf areas are to be cleared of trash and debris during every visit. (Pic 1a, 1b>, 1c>)

- 2. Broken Limbs – Shrubs:** During the inspection, several plants were noted with browning limbs. Upon closer review, these limbs were found to be broken rather than naturally declining. The Podocarpus shrubs appear to have been recently trimmed (very nice by the way); however, clarification is requested on whether the remaining shrubs will have their broken and dead limbs....

(#2 Cont.).... removed during an upcoming visit to restore plant health and appearance. (Pic 2a>, 2b>, 2c>)

Wiregrass Ranch Blvd

3. Mower Tracks – Median Planting Beds:

Ruts were noted in several planting beds along the median, and plant decline is evident within these depressed areas. The affected plants appear stressed, and weedy growth....

(#3 Cont.).... is beginning to establish in the disturbed soil. This damage suggests that mowing equipment may be driving through the planting beds to access adjacent turf areas. This practice must stop immediately, as it is causing plant decline and compromising bed integrity. Crews should use designated turf paths only, or roadways, and avoid all planted areas to prevent further damage. (Pic 3a, 3b)

4. Tree Straps: During the last Board meeting, tree support straps were discussed. Straps should be removed where they are no longer needed and properly re-strapped where support is still required. Please have the crew address all tree straps during the next scheduled visit, there were at least 10 trees that have been documented.

(Pic 4a>, 4b>, 4c>)

Wiregrass Ranch Blvd

5. Weedy Plants – Planting Beds: Several instances were observed where unwanted or non-designated plants were growing within established plant material. During scheduled detail days, please remind the crew to....

(#5 Cont.).... to remove all invasive or unintended plants, ensuring only the originally designed and intended plant species remain within each planting area to maintain plant health and a clean, uniform appearance. (Pic 5a, 5b)

6. Tree Removal – Construction Area: Near the construction area, please remove the large tree sapling growing within the muhly grasses. Be sure to remove the entire root system, as this tree will continue to grow and compete with the ornamental grasses if not fully extracted. (Pic 6>)

7. Muhly Grasses – Weed Infestation: Although it is difficult to clearly see in the photo, vetch weed is encroaching on and overtaking several of the muhly....**(Next page)**

Wiregrass Ranch Blvd

(#7 Cont.).... grass tops. Please ensure this weed growth is removed during the next scheduled detailing visit to prevent further spread and to restore the health and appearance of the grasses. (Pic 7a, 7b)

8. Sunrise – Weedy Turf in Shrubs: Zoysia turf is growing within the viburnum shrubs. During the next visit, please remove all turf encroachment and detail the area thoroughly to prevent competition with the shrubs. (Pic 8)

9. Sunrise – Bed Edging: The planting bed edges are deteriorating and becoming indistinct. During the next scheduled detailing visit, please clean up and re-establish all bed edges.

10. Sunrise – Volunteer Trees in Planting Beds: A significant number of wax myrtles and several oak saplings were observed growing within planting beds and among existing shrubs. These species establish quickly and should be removed as soon as possible, including all roots, before they become further established and cause damage or overcrowding within the beds.

11. Wiregrass Ranch Blvd – Median Irrigation: A missing irrigation valve lid was observed in the median bed along Wiregrass Ranch Blvd, located adjacent to one of the trash lids. Please replace the missing irrigation lid during the next visit to ensure system protection and safety. (Pic 11>)

12. Mulch / Weed Control: In areas where mulch coverage is thinning or absent, weedy growth is significantly heavier. These....**(Nxt pg)**

(#12 Cont.).... weeds are currently averaging 6–10 inches in height and should be removed by hand to ensure proper removal and prevent further spread. (Pic 12a, 12b, 12c>)

13. Junipers – Browning Limbs: During the next detailing event, please have the crew clip out and remove all browning or dead limbs from the junipers throughout the boulevard to improve plant health and maintain a clean, uniform appearance. (Pic 13)

14. Palmettos – Plant Health & Debris: Hughes, please assess the palmettos, as several are exhibiting more yellowing than expected and may be showing signs of chlorosis. Sunrise, trash debris continues to be an issue—plastic bags were observed caught within plant branching in multiple areas. Please ensure all trash is removed during the next visit, including debris lodged within shrubs and trees. (Pic 14>)

Wiregrass Ranch Blvd

15. Volunteer Tree Growth in Shrubs: Another instance of a tree growing within shrubs. Please address and remove all volunteer trees and all previously noted areas to prevent further competition, and long-term landscape damage. (Pic 15a, 15b>, 15c>)

16. Texas Sage – West Side of Boulevard: On the west side of the boulevard, the Texas sage has not been thriving, and the planting bed is now experiencing increased growth of small weedy plants throughout the mulched areas. These weeds should be treated and removed promptly to prevent further spread.

17. Dandelions: A heavy presence of dandelions was noticed actively growing and going to seed. These should be treated and removed immediately upon detection.

18. Pine Trees – Tree Straps: As noted earlier in the report, the tree support straps are an ongoing issue. Several straps are now constricting the trunks of the pine trees, causing visible stress and potential long-term damage. These straps must be adjusted, re-strapped properly, or removed immediately where no longer needed to prevent girdling. (Pic 18a>, 18b>, 18c>, 18d>>)

19. Bed Edge & Weed Growth – Median: Another section of the median requires corrective attention due to significant weed growth, lost bed edging, and missing plants. Please have the crew visit this area, remove existing weeds, re-establish clean bed edges, and evaluate plant losses so the area can be treated and restored appropriately.

Wiregrass Ranch Blvd

20. Tire Ruts – Turf Areas: The cause of this issue is unclear; however, tire tracks were noted in the turf along the east side of the Blvd., resulting in noticeable ruts. If the crew encounters this area during service, please have them tamp down and level the raised and rutted sections to help restore an even turf surface and prevent further turf stress or damage. (Pic 20)

21. Fakahatchee Grasses: Vetch weed is encroaching on the tips of new growth on the Fakahatchee grasses and beginning to overtake the plant canopy. This should be removed during the next visit to prevent the grasses' natural growth habit. Additionally, an active ant mound near the center of the area. Please treat the mound accordingly, and once inactive, rake away and level. (Pic 21>)

Wiregrass Ranch Blvd

22. Tree Well – West ROW: Previously reported condition remains unchanged. The drip line is still actively supplying water to the tree well. At this time, request that the crew secure/screw down the cap to temporarily shut off irrigation in this area to conserve water until a replacement tree is installed. (Pic 22)

24. Tree Saplings: Please remind the crew that during bed detailing, all volunteer tree saplings growing within planted areas must be removed immediately to prevent competition with existing plants and maintain proper bed appearance. (Pic 24)

23. Dead Palm Tree: This palm has been in a declined condition for several months. Upon inspection, the trunk was found to be hollow, raising safety concerns regarding potential failure during strong wind events. It is highly recommended that this palm be proposed for removal. A replacement can be discussed following completion of the RFP process. (Pic 23>)

COMMUNITY ASSET MANAGEMENT REPORT

April 02, 2026

Rizzetta & Company

Amiee Brodeen – Community Asset Manager

Rizzetta & Company
Professionals in Community Management

Summary, Wiregrass Ranch Blvd

General Updates, Recent & Upcoming Maintenance

- Irrigation Repairs: During each maintenance visit the crew lead should be noting all the broken irrigation heads, driplines, etc., for repair. Please be sure this is occurring.
- Trash and debris: Please ensure that all trash and debris are picked up and removed throughout the property each visit. I observed a pile of debris along the median—this should not be happening.

The following are action items for Sunrise and Hughes to complete. Please refer to the item # in your response listing action already taken or anticipated time of completion. **Red text** indicates deficient from previous report. **Bold Red text** indicates deficient for more than a month. **Green text** indicates a proposal has been requested. **Blue** indicates irrigation. **Orange** is for staff. **Bold underlined is info. or questions for BOS or Developer.**

- 1. Sunrise – Trash Debris:** Despite the crew servicing the site the day prior to the inspection, a significant amount of trash was scattered in the planting beds and some within the turf areas. Please remind the crew that all planting beds and turf areas are to be cleared of trash and debris during every visit. (Pic 1a, 1b>, 1c>)

- 2. Broken Limbs – Shrubs:** During the inspection, several plants were noted with browning limbs. Upon closer review, these limbs were found to be broken rather than naturally declining. The Podocarpus shrubs appear to have been recently trimmed (very nice by the way); however, clarification is requested on whether the remaining shrubs will have their broken and dead limbs....

(#2 Cont.).... removed during an upcoming visit to restore plant health and appearance. (Pic 2a>, 2b>, 2c>)

Wiregrass Ranch Blvd

3. Mower Tracks – Median Planting Beds:

Ruts were noted in several planting beds along the median, and plant decline is evident within these depressed areas. The affected plants appear stressed, and weedy growth....

(#3 Cont.).... is beginning to establish in the disturbed soil. This damage suggests that mowing equipment may be driving through the planting beds to access adjacent turf areas. This practice must stop immediately, as it is causing plant decline and compromising bed integrity. Crews should use designated turf paths only, or roadways, and avoid all planted areas to prevent further damage. (Pic 3a, 3b)

4. **Tree Straps:** During the last Board meeting, tree support straps were discussed. Straps should be removed where they are no longer needed and properly re-strapped where support is still required. Please have the crew address all tree straps during the next scheduled visit, there were at least 10 trees that have been documented.

(Pic 4a>, 4b>, 4c>)

5. Weedy Plants – Planting Beds: Several instances were observed where unwanted or non-designated plants were growing within established plant material. During scheduled detail days, please remind the crew to....

(#5 Cont.).... to remove all invasive or unintended plants, ensuring only the originally designed and intended plant species remain within each planting area to maintain plant health and a clean, uniform appearance. (Pic 5a, 5b)

6. Tree Removal – Construction Area: Near the construction area, please remove the large tree sapling growing within the muhly grasses. Be sure to remove the entire root system, as this tree will continue to grow and compete with the ornamental grasses if not fully extracted. (Pic 6>)

7. Muhly Grasses – Weed Infestation: Although it is difficult to clearly see in the photo, vetch weed is encroaching on and overtaking several of the muhly....**(Next page)**

8. Sunrise – Weedy Turf in Shrubs: Zoysia turf is growing within the viburnum shrubs. During the next visit, please remove all turf encroachment and detail the area thoroughly to prevent competition with the shrubs. (Pic 8)

9. Sunrise – Bed Edging: The planting bed edges are deteriorating and becoming indistinct. During the next scheduled detailing visit, please clean up and re-establish all bed edges.

10. Sunrise – Volunteer Trees in Planting Beds: A significant number of wax myrtles and several oak saplings were observed growing within planting beds and among existing shrubs. These species establish quickly and should be removed as soon as possible, including all roots, before they become further established and cause damage or overcrowding within the beds.

11. Wiregrass Ranch Blvd – Median Irrigation: A missing irrigation valve lid was observed in the median bed along Wiregrass Ranch Blvd, located adjacent to one of the trash lids. Please replace the missing irrigation lid during the next visit to ensure system protection and safety. (Pic 11>)
