Board of Supervisors
Water's Edge Community
Development District

7/16/2026

FINAL AGENDA

Dear Board Members:

The regular meeting of the Board of Supervisors of the Water's Edge Community Development District will be held on **Thursday, July 23, 2026, at 5:00 p.m. at the Water's Edge Clubhouse, located at 9019 Creedmoor Lane, New Port Richey, FL 34654**. The following is the agenda for this meeting.

BOS MEETING

1. **CALL TO ORDER/ROLL CALL**
2. **AUDIENCE COMMENTS ON AGENDA ITEMS**
3. **STAFF REPORTS**
   - **A.** Aquatics Manager Monthly Report ....Tab 1
   - **B.** Irrigation Report
   - **C.** District Engineer Report .....Tab 2
     1. Update on Dumping at 10940 Oyster Bay Circle
   - **D.** PSA Landscape Inspection Reports.....Tab 3
   - **E.** District Counsel
   - **F.** District Manager Report .....Tab 4
     1. Review of 2nd Quarter Website Audit Report.....Tab 5
4. **BUSINESS ITEMS**
   - **A.** Discussion on Belle Haven Landscape Lighting
   - **B.** Discussion on Resident Irrigation Education Workshop Dates
   - **C.** Ratification of Leaking Backflow Device Proposal ....Tab 6
5. **BUSINESS ADMINISTRATION**
   - **A.** Consideration of Minutes of the Board of Supervisors' Regular Meeting held on June 25, 2026……Tab 7
   - **B.** Consideration of Operations and Maintenance Expenditures for June 2026……Tab 8
6. **AUDIENCE COMMENTS AND SUPERVISOR REQUESTS**
7. **ADJOURNMENT**

We look forward to seeing you at the meeting. In the meantime, if you have any questions, please do not hesitate to call us at (813) 994-1001.

Sincerely,

Lisa Castoria

District Manager

SUMMARY:

The hardest days of summer are here. Water temperatures are extremely high through the next 3 months and Algae blooms will be treated and aggressively prevented. Dissolved oxygen levels are very low. Treatments will be done more strategically to prevent oxygen loss and inspections will be more frequent this time of year to help stay ahead of these blooms.

Waters Edge Community Development District Engineer's Report:

10940 Oyster Bay Circle – Unauthorized Dumping in Conservation area

- Staff reviewed cleanup efforts on 7/8/26 and found dumping to have been cleaned up, and conservation area to be in compliance. Photo attached.

Castine Street Stormwater Cleaning

- Jetting and Vac services completed on 7/13. Invoice and report of completed efforts attached.

Pond AA1 – Fencing Installation and Flume Repair

- Stantec staff reviewed broken reclaimed flume and services agreement with Pasco County. Services agreement lists the County as the maintenance entity for transmitting reclaimed water into the CDD owned reclaimed pond. We are awaiting status for repairs.
- Stantec staff recommends putting fence project on hold until flume is repaired and/or arrangements are made for access to the pond.

K:\47\Projects\Construction\PDP Plans\Victon\47_PDP-Dec Site.dwg - Aug 28, 2017 @ 11:13am - jlaska

shown on the attached Exhibit A. The COUNTY will be responsible for the design, permitting, and construction of the reclaimed water mains to the storage pond/irrigation system(s). The OWNERS agree that the COUNTY shall have reasonable access to the Property for necessary construction, maintenance, modification, and repairs of the reclaimed water mains. Upon completion of the PROJECT, maintenance and operation of onsite pump stations, including electric power cost, fuel cost, pump repairs, or supply well repairs shall be the sole responsibility of the OWNERS. The OWNERS shall also be responsible for the operation and maintenance of the distribution piping and irrigation system(s) on the property, including the OWNERS' pumping facilities.

8. The COUNTY, at its cost, shall provide, operate, and maintain the necessary treatment and reclaimed water transmission facilities to provide reclaimed water to the OWNERS' pond.

9. The OWNERS further agree to pay the COUNTY for reclaimed water service at the then existing reclaimed water rates as established from time to time by the Board of County Commissioners. The OWNERS understand this is a variable rate and it is subject to change based on a range of hydrologic conditions and the supply and demand of reclaimed water across the System as set and determined by the COUNTY.

10. The issuance of any permit or permits by the FDEP and the COUNTY'S construction of its transmission and pumping facilities necessary to effectuate the purpose of this agreement shall be an express condition precedent to the effectiveness of this agreement.

11. Subject to available quantities of reclaimed water and Permit conditions, the COUNTY agrees to provide, and the OWNERS agree to accept, the maximum amount of reclaimed water the Property is capable of adequately handling, so long as the application of the reclaimed water does not cause damage to the Property which would adversely affect the use thereof, in the opinion of the OWNERS. As long as this agreement shall remain in effect, the OWNERS shall have the use of the reclaimed water from the System at an equal priority as all other customers of the System. The OWNERS acknowledge that the COUNTY cannot guarantee reclaimed water will be available at all times.

12. If available reclaimed water is insufficient to satisfy the OWNERS' requirements for the Property, the OWNERS shall use its onsite wells or other permitted water sources for normal watering. The

LANDSCAPE INSPECTION RESULTS

Date:	July 2, 2026
Client:	Water's Edge HOA/CDD
HOA/CDD:	Mickey McCarthy
Manager:	Rocco Iervasi
Ameriscape:	Al Suarez, Bill Milligan
PSA:	Tom Picciano

This landscape inspection report and subsequent ones will serve as both a benchmark of current landscape maintenance concerns and the progress toward corrective actions. It will also serve as a deficiency list of items that should be addressed under the current landscape maintenance agreement.

These items must be completed by July 20, 2026. Notify PSA in writing upon their completion, via fax or email, on or before 9:00 am on July 21, 2026. The contractor must initial the bottom of each page and sign at the bottom of the last page. The reason for any uncompleted deficiency must be listed.

SCORE 1=POOR 2= FAIR 3=GOOD

3 MOWING/EDGING/TRIMMING

The turf was neatly mowed at the correct height. The blades were sharp leaving a clean crisp cut. The beds were neatly defined. The hard edging was vertical, and all the edged material was cleaned out. The concrete surfaces were blown clean. There were no issues related to the mowing operation.

Moon Lake-keep bike path edged.

2 TURF COLOR

The color of the St. Augustine has diminished due to the disease activity in much of the high visibility turf panels.

Belle Haven entry and exit drive-the St. Augustine turf color ranged from a mottled medium green to a consistent medium green.

Slidell entry side- the St. Augustine turf color remained a mottled medium green with some heavy lime green discoloration.

Veteran's Park-the Bahiagrass turf color was mottled medium green.

Clubhouse parking lot fence line- the St. Augustine turf color ranged from a lightly mottled medium green to a consistent medium green.

Clubhouse front left side and berm area- the St. Augustine turf color of the berm ranged from a mottled medium green to a consistent medium green. The St. Augustine turf color at the large oak ranged from a mottled medium green to a consistent medium green.

Basketball court-the St. Augustine turf color ranged from a mottled medium green to a consistent medium green.

Clubhouse along the northern section of Moon Lake Road fence-the Bahiagrass turf color was a mottled medium green.

Bahiagrass throughout the community-the Bahiagrass turf color was a mottled medium green.

July *July*

June *June* *June*

June

May *May*

April *April*

2 TURF DENSITY

The regular rainfall has improved the density of the Bahiagrass. The St. Augustine turf density is being adversely affected by disease activity. .

Clubhouse front left side and berm area- the St. Augustine turf density of the berm ranged from fair to good. The St. Augustine turf density at the front left corner by large oak ranged from poor to fair. Disease activity affected the area.

Clubhouse along the northern section of Moon Lake Road fence line- the Bahiagrass turf density was good.

Clubhouse parking lot fence line-the St. Augustine turf density remained strong.

Other common areas–the Bahiagrass turf density was good.

Veteran's Park- the Bahiagrass turf density ranged from fair to good.

Slidell- the St. Augustine turf density ranged from poor to good. Disease activity affected the area.

Belle Haven entry and exit drive from Moon Lake to Creedmoor-the St. Augustine density ranged from poor to good. Disease activity affected the area.

Clubhouse basketball court sidewalk area-the St. Augustine density ranged from poor to good. Disease activity affected the area.

3 TURF WEED CONTROL

General workorder-broadleaf weeds were present in all viable St. Augustine turf panels. Their volume was low.

The turf has a relatively low volume of broadleaf weeds. It is recommended that treatments occur in the cooler early morning temperatures or postpone them until the overall cooler weather of fall to kill off the weeds.

2 TURF INSECT/DISEASE CONTROL/OVERALL HEALTH

Basketball court- replace new sod that has died and install new sod in other areas that have died. Treat disease activity. WARRANTY WORK. *Photo below.*

Clubhouse boat ramp area- replace dead sod. WARRANTY WORK. *Photo below.*

Slidell entry Drive- treat disease activity close to Moon Lake Road. *Photo below.*

Clubhouse front left corner- treat disease activity. *Photo below*.

Clubhouse left side berm- treat disease activity.

Belle Haven entry and exit drive from Moon Lake Road to Creedmoor-treat disease activity.

All turf that has died from disease activity needs to be replaced under warranty.

The turf was cut at the correct height with sharp blades. The higher mowing height allows for increased food production through photosynthesis. St. Augustine turf color, density and overall health have diminished over the past month due to prevalent disease activity. Broadleaf weed volume was low. There were no indications of insect activity but disease activity has affected the high visibility St. Augustine turf. Treatment for disease control must be started immediately. Reduce irrigation to turf to lessen chance of further disease outbreak. Dead turf needs to be replaced under warranty. Turf replacement should be done in conjunction with fungicide applications.

3 SHRUB/TREE INSECT/DISEASE CONTROL/OVERALL HEALTH

Most shrubs that are in decline have suffered from winter damage, early season drought or have “aged out”

Belle Haven entry drive at Moon Lake Road - remove dead azaleas.

Veterans Park - roebellini palm has frizzletop. Fertilize with palm specific fertilizer. Its condition has improved. It may be beneficial to insert fertilizer directly into the soil.

Creedmoor at boat ramp driveway- remove dead hollies.

11727 Belle Haven- treat fakahatchee grass for spider mites.

Basketball court pond- remove dead hollies along sidewalk. *Photo below.*

11601 Belle Haven- remove all dead lorapetalum.

11718 Belle Haven- remove dead azaleas.

11726 Belle Haven- treat fakahatchee grass for spider mites.

11715 Belle Haven -remove dead azaleas.

Outer Moon Lake Road wall- treat fakahatchee grass for spider mites.

3 BED WEED CONTROL

Bed weed control was strong.

2 IRRIGATION MANAGEMENT

Clubhouse front left corner - dripline is kinked over magnolia root. It needs to be cut, loosened and reconnected. *Photo below.*

It appears that the turf is receiving excessive irrigation which is worsening disease activity. The seasonal adjustment should be reduced and watering days if necessary.

3 SHRUB PRUNING

*It should be noted that the shrubs, including but not limited to, the hawthorns and schilling hollies, should not be pruned too tightly. This means that too much vegetative growth is being removed, limiting the plants availability to make food for itself. In addition, the plant will look more attractive by not having "holes" in it and allowing it to develop its more natural shape. (i.e. Indian Hawthorn has a natural mounded habit) Belle Haven entry drive inside of gate-prune dead sections out of juniper. *Photo below.*

Outer Moon Lake Road wall- remove scorched leaves from shell ginger and dead leaves from philodendron.

Belle Haven entry drive inside of gate-remove dead sections from juniper. *Photo below.*

Shrubs were pruned in accordance with their rotational schedule, and no immediate attention was needed.

3 TREE PRUNING

Clubhouse parking lot- remove dead palm fronds from palms at north end of lot.

Fairhope- prune oak tree away from streetlight.

Oyster Bay common area-prune away any low hanging branches over street.

Creedmoor common area- prune away any low hanging branches over street.

3 CLEANUP/RUBBISH REMOVAL

There was not a significant amount of litter or vegetative debris that needed to be removed.

N/A APPEARANCE OF SEASONAL COLOR

(0) CARRIED FORWARD FROM PRIOR MONTH

INSPECTION SCORE 29 of 33 –Passing score is 30 of 36 or 28 of 33 (with no seasonal color.)**PASSED INSPECTION Payment for July services should be released after the receipt of the DONE REPORT.**

SUMMARY

ASI performed to contractual standards for this inspection. The main issue associated with this inspection was the prevalence of disease activity in all high visibility St. Augustine turf. Fungicide applications in conjunction with proper irrigation management will help to reduce disease presence. Warranty installation of sod is necessary. There were no major deficiencies regarding the other components that make up the landscape maintenance program.
ASI certifies that all work on this list has been completed in the 14-day timeframe specified in the contractual agreement and provided to PSA within the same period.

Compliance Audit Overview

The Community Website Compliance Audit (CWCA) consists of a thorough assessment of Florida Community Development District (CDD) websites to assure that specified district information is available and fully accessible. Florida Statute Chapter 189.069 states that effective October, 2015, every CDD in the state is required to maintain a fully compliant website for reporting certain information and documents for public access.

The CWCA is a reporting system comprised of quarterly audits and an annual summary audit to meet full disclosure as required by Florida law. These audits are designed to assure that CDDs satisfy all compliance requirements stipulated in Chapter 189.069.

Compliance Criteria

The CWCA focuses on the two primary areas – website accessibility as defined by U.S. federal laws, and the 16-point criteria enumerated in Florida Statute Chapter 189.069.

ADA Website Accessibility

Several federal statutes (American Disabilities Act, Sec. 504 and 508 of the Rehabilitation Act of 1973) require public institutions to ensure they are not discriminating against individuals on the basis of a person's disability. Community websites are required to conform to web content accessibility guidelines – WCAG 2.1, which is the international standard established to keep websites barrier-free and the recognized standard for ADA-compliance.

Florida Statute Compliance

Pursuant to F.S. 189.069, every CDD is required to maintain a dedicated website to serve as an official reporting mechanism covering, at minimum, 16 criteria. The information required to report and have fully accessible spans: establishment charter or ordinance, fiscal year audit, budget, meeting agendas and minutes and more. For a complete list of statute requirements, see page 3.

Audit Process

The Community Website Compliance Audit covers all CDD web pages and linked PDFs.* Following the WCAG 2.1 levels A, AA, and AAA for web content accessibility, a comprehensive scan encompassing 312 tests is conducted for every page. In addition, a human inspection is conducted to assure factors such as navigation and color contrasts meet web accessibility standards. See page 4 for complete accessibility grading criteria.

In addition to full ADA-compliance, the audit includes a 16-point checklist directly corresponding with the criteria set forth in Florida Statute Chapter 189.069. See page 5 for the complete compliance criteria checklist.

* **NOTE**: Because many CDD websites have links to PDFs that contain information required by law (meeting agendas, minutes, budgets, miscellaneous and ad hoc documents, etc.), audits include an examination of all associated PDFs. **PDF remediation** and ongoing auditing is critical to maintaining compliance.

ADA Website Accessibility

Result: PASSED

Accessibility Grading Criteria

Passed	Description
Passed	**Website errors*** **0** WCAG 2.1 errors appear on website pages causing issues**
Passed	**Keyboard navigation** The ability to navigate website without using a mouse

Accessibility overview

Everyone deserves equal access.

With nearly 1-in-5 Americans having some sort of disability – visual, hearing, motor, cognitive – there are literally millions of reasons why websites should be fully accessible and compliant with all state and federal laws. Web accessibility not only keeps board members on the right side of the law, but enables the entire community to access all your web content. The very principles that drive accessible website design are also good for those without disabilities.

The legal and right thing to do

Several federal statutes (American Disabilities Act, Sec. 504 and 508 of the Rehabilitation Act of 1973) require public institutions to ensure they are not discriminating against individuals on the basis of a person's disability. Community websites are required to conform to web content accessibility guidelines, WCAG 2.1, the international standard established to keep websites barrier-free. Plain and simple, any content on your website must be accessible to everyone.

ADA Compliance Categories

Most of the problems that occur on a website fall in one or several of the following categories.

Contrast and colors

Some people have vision disabilities that hinder picking up contrasts, and some are color blind, so there needs to be a distinguishable contrast between text and background colors. This goes for buttons, links, text on images – everything. Consideration to contrast and color choice is also important for extreme lighting conditions.

Contract checker: *http://webaim.org/resources/contrastchecker*

Using semantics to format your HTML pages

When web page codes are clearly described in easy-to-understand terms, it enables broader sharing across all browsers and apps. This 'friendlier' language not only helps all the users, but developers who are striving to make content more universal on more devices.

Text alternatives for non-text content

Written replacements for images, audio and video should provide all the same descriptors that the non-text content conveys. Besides helping with searching, clear, concise word choice can make vivid non-text content for the disabled.

Helpful article: *http://webaim.org/techniques/alttext*

Ability to navigate with the keyboard

Not everyone can use a mouse. Blind people with many with motor disabilities have to use a keyboard to make their way around a

website. Users need to be able to interact fully with your website by navigating using the tab, arrows and return keys only. A “skip navigation” option is also required. Consider using WAI-ARIA for improved accessibility, and properly highlight the links as you use the tab key to make sections.

Helpful article: *www.nngroup.com/articles/keyboard-accessibility*
Helpful article: *http://webaim.org/techniques/skipnav*

Easy to navigate and find information

Finding relevant content via search and easy navigation is a universal need. Alt text, heading structure, page titles, descriptive link text (no ‘click here’ please) are just some ways to help everyone find what they’re searching for. You must also provide multiple ways to navigate such as a search and a site map.

Helpful article: *http://webaim.org/techniques/sitetools/*

Properly formatting tables

Tables are hard for screen readers to decipher. Users need to be able to navigate through a table one cell at a time. In addition to the table itself needing a caption, row and column headers need to be labeled and data correctly associated with the right header.

Helpful article: *http://webaim.org/techniques/tables/data*

Making PDFs accessible

PDF files must be tagged properly to be accessible, and unfortunately many are not. Images and other non-text elements within that PDF also need to be ADA-compliant. Creating anew is

one thing; converting old PDFs – called PDF remediation – takes time.

Helpful articles: *http://webaim.org/techniques/acrobat/acrobat*

Making videos accessible

Simply adding a transcript isn't enough. Videos require closed captioning and detailed descriptions (e.g., who's on-screen, where they are, what they're doing, even facial expressions) to be fully accessible and ADA compliant.

Helpful article: *http://webaim.org/techniques/captions*

Making forms accessible

Forms are common tools for gathering info and interacting. From logging in to registration, they can be challenging if not designed to be web-accessible. How it's laid out, use of labels, size of clickable areas and other aspects need to be considered.

Helpful article: *http://webaim.org/techniques/forms*

Alternate versions

Attempts to be fully accessible sometimes fall short, and in those cases, alternate versions of key pages must be created. That is, it is sometimes not feasible (legally, technically) to modify some content. These are the 'exceptions', but still must be accommodated.

Feedback for users

To be fully interactive, your site needs to be able to provide an easy way for users to submit feedback on any website issues. Clarity is

key for both any confirmation or error feedback that occurs while engaging the page.

Other related requirements

No flashing

Blinking and flashing are not only bothersome, but can be disorienting and even dangerous for many users. Seizures can even be triggered by flashing, so avoid using any flashing or flickering content.

Timers

Timed connections can create difficulties for the disabled. They may not even know a timer is in effect, it may create stress. In some cases (e.g., purchasing items), a timer is required, but for most school content, avoid using them.

Fly-out menus

Menus that fly out or down when an item is clicked are helpful to dig deeper into the site's content, but they need to be available via keyboard navigation, and not immediately snap back when those using a mouse move from the clickable area.

No pop-ups

Pop-up windows present a range of obstacles for many disabled users, so it's best to avoid using them altogether. If you must, be sure to alert the user that a pop-up is about to be launched.

Web Accessibility Glossary

Assistive technology	Hardware and software for disabled people that

	enable them to perform tasks they otherwise would not be able to perform (e..g., a screen reader)
WCAG 2.0	Evolving web design guidelines established by the W3C that specify how to accommodate web access for the disabled
504	Section of the Rehabilitation Act of 1973 that protects civil liberties and guarantees certain rights of disabled people
508	An amendment to the Rehabilitation Act that eliminates barriers in information technology for the disabled
ADA	American with Disabilities Act (1990)
Screen reader	Software technology that transforms the on-screen text into an audible voice. Includes tools for navigating/accessing web pages.
Website accessibility	Making your website fully accessible for people of all abilities
W3C	World Wide Web Consortium – the international body that develops standards for using the web

Notes:

7.5HP Pond Fill Pump
This estimate includes all labor, materials, and equipment required to reconfigure the existing pump station for its intended use as a pond recharge pump station.

During inspection, it was determined that the existing Cycle Stop Valve (CSV) has failed and is no longer regulating low-flow conditions as designed. This failure prevents the system from maintaining proper operating pressure during reduced flow demand and can lead to excessive pump cycling, reduced equipment life, and unreliable system performance. Additionally, the existing Pressure Vacuum Breaker (PVB) is leaking and has reached the end of its serviceable life, requiring replacement to restore proper operation.

As part of this project, Sprinkler Solutions of Florida will:

Remove the existing failed Cycle Stop Valve and install a new properly sized Cycle Stop Valve.
Remove and replace the leaking Pressure Vacuum Breaker (PVB).
Remove the existing bladder tank and pressure switch, as these components are not required for the pump station's intended operation as a pond recharge system.
Reconfigure and modify the pump station piping and controls to provide a simplified and reliable configuration specifically designed for pond recharge applications.
Install all required fittings, valves, gauges, and miscellaneous materials necessary to complete the reconfiguration in accordance with irrigation industry standards.
Test and commission the pump station upon completion to verify proper operation, pressure regulation, and system performance.

Once completed, the pump station will be configured specifically for pond recharge service, reducing unnecessary components, improving operational reliability, and minimizing future maintenance requirements while providing consistent pump performance under varying flow conditions.

Replace failed Cycle Stop and Leaking Backflow Device

Rebuild Pump Station for recharge vs Pressure

Item	Unit Price	Quantity	Amount

MINUTES OF MEETING

Each person who decides to appeal any decision made by the Board with respect to any matter considered at the meeting is advised that the person may need to ensure that a verbatim record of the proceedings is made, including the testimony and evidence upon which such appeal is to be based.

WATERS EDGE
COMMUNITY DEVELOPMENT DISTRICT

The regular meeting of the Board of Supervisors of Waters Edge Community Development District to be held on **Thursday, June 25, 2026, at 5:00 p.m.** at the Waters Edge Clubhouse, located at 9019 Creedmoor Lane, New Port Richey, FL 34654.

Present and constituting a quorum:

Ken Smith	**Board Supervisor, Chairman**
George Anastasopoulos	**Board Supervisor, Vice Chairman**
Craig Pettitt	**Board Supervisor, Assistant Secretary**
Dan Knoblock	**Board Supervisor, Assistant Secretary**

Also present were:

Lisa Castoria	**District Manager, Rizzetta & Co., Inc.**
Whitney Sousa	**District Counsel, Straley, Robin & Vericker (via phone)**
Frank Nolte	**District Engineer, Stantec (via phone)**
Jeff Hewitt	**Sprinkler Solutions**
Audience	**Not Present**

FIRST ORDER OF BUSINESS **Call to Order**

Ms. Castoria called the meeting to order at 5:00 p.m. and confirmed there was a quorum.

SECOND ORDER OF BUSINESS **Audience Comments on Agenda Items**

There were no audience members present.

DRAFT

THIRD ORDER OF BUSINESS **Staff Reports**

A. Aquatics Managers Monthly Report

The Board reviewed the monthly aquatics report. There were no comments at this time.

B. Irrigation Report

The Board held a discussion on a resident request for assistance with irrigation and findings of the inspection areas. Mr. Hewitt requested permission to perform a system flush and the HOA is requesting access to controls to the irrigation. The Board would like Sprinkler Solutions to be the only one with control access to irrigation.

There was a discussion on SWFWMD water restrictions being extended until 10/1/2026.

C. District Engineer

The Board reviewed the engineer's report.

i. Update on Dumping at 10940 Oyster Bay Circle

This item has been tabled to the July meeting.

The Board held a discussion on resident request for CDD to maintain the large hedge adjacent to his property at 11623 Manistique Way. It was noted that this hedge was not planted by the CDD or intended as a landscape feature. The Board requests that the resident be given permission to hire a licensed/insured vendor to remove or maintain the hedge or the resident may trim the hedge that is encroaching onto their property.

Mr. Nolte gave a quick update on jet/vacuum and temporary hydrant meter access provided.

D. PSA Inspection Reports

The Board reviewed the PSA report. There were no questions or comments at this time.

E. District Counsel

No Report

F. District Manager

Ms. Castoria advised that the next meeting is scheduled for July 23, 2026, at 5:00 pm and reviewed the monthly report with the Board.

DRAFT

FOURTH ORDER OF BUSINESS **Consideration of Belle Haven Landscape Lighting Proposals**

After a brief discussion, the Board agreed to hold a workshop meeting to further discussion landscape lighting.

FIFTH ORDER OF BUSINESS **Consideration of Stantec Storm Pipe Jet-Vac Proposal**

> On a motion by Mr. Pettitt, seconded by Mr. Anastasopoulos, with all in favor, the Board of Supervisors approved the Stantec Storm Pipe Jet-Vac Proposal in the amount of $2,800, for Waters Edge Community Development District.

SIXTH ORDER OF BUSINESS **Ratification of Pasco County Hydrant Meter Request**

> On a motion by Mr. Smith, seconded by Mr. Pettitt, with all in favor, the Board of Supervisors ratified the Pasco County Hydrant Meter Request, for Waters Edge Community Development District.

SEVENTH ORDER OF BUSINESS **Review of Grau and Associates Audit Response for FY 24-25**

The Board reviewed this response and had no questions or concerns at this time.

EIGHTH ORDER OF BUSINESS **Discussion on Educational Workshop on Irrigation for Residents**

The Board held a discussion on holding an Educational Workshop on Irrigation for Residents. They agreed to hold a workshop for this on July 25, 2026 at 10:00 a.m.

> On a motion by Mr. Pettitt, seconded by Mr. Anastasopoulos, with all in favor, the Board of will hold an Educational Workshop on Irrigation for Residents on July 25, 2026 at 10:00 a.m., for Waters Edge Community Development District.

They also discussed and agreed to hold a workshop for Landscape Lighting on July 20, 2026 at 10:00 a.m.

> On a motion by Mr. Pettitt, seconded by Mr. Anastasopoulos, with all in favor, the Board of will hold a Landscape Lighting Workshop on July 20, 2026 at 10:00 a.m., for Waters Edge Community Development District.

DRAFT

NINTH ORDER OF BUSINESS **Consideration of the Minutes of the Board of Supervisors' Regular Meeting held on May 28, 2026**

> On a motion by Mr. Smith, seconded by Mr. Knoblock, with all in favor, the Board of Supervisors approved the minutes for the regular meeting that was held on May 28, 2026, as presented, for Waters Edge Community Development District.

TENTH ORDER OF BUSINESS **Consideration of Operation and Maintenance Expenditures for May 2026**

> On a motion by Mr. Anastasopoulos, seconded by Mr. Smith, with all in favor, the Board of Supervisors ratified the operation and maintenance expenditures for May 2026 ($31,625.31), for Waters Edge Community Development District.

ELEVNTH ORDER OF BUSINESS **Audience Comments & Supervisor Requests**

Mr. Anastasopoulos voiced his concerns with the current fencing options that were previously approved. After a brief discussion, a motion was made to appoint Mr. Pettitt to work with DDD on choosing new fencing options.

> On a motion by Mr. Anastasopoulos, seconded by Mr. Smith, with all in favor, the Board of Supervisors appoint Mr. Pettitt to work with DDD on choosing new fencing options for Waters Edge Community Development District.

TWELFTH ORDER OF BUSINESS **Adjournment**

> On a motion by Mr. Pettitt, seconded by Mr. Smith, with all in favor, the Board of Supervisors adjourned the meeting at 6:28 p.m., for Waters Edge Community Development District.

Payment Terms: 10 Day Net

Notes:

2023F350DRW
Mike P

Talked to Kevin on the phone when I arrived on site. He told me the Belle Haven well wasn't running consistently so I told him I'd check that out. I also informed him the totalizer had been added to the pump station screen so the meter reading for the main pump station can now be taken going forward. Kevin asked about when we'll be able to have the main pump station running for test days, Jeff is going to talk to him about that. I adjusted main pump station pressure from 75 to 78PSI and added 2 tabs of chlorine to each of the 6 filter tanks. After checking out both wells I adjusted parameters on the Belle Haven well and the pump is not cycling like it was before. I kicked both wells on with new Hunter I2C controller by the main pump station. I went over to both Biddeford, and Belle Haven wells to ensure they both kicked on and were up to pressure. Both showed they were running between 65-70PSI. To confirm, I turned on a big rotor zone, and big spray zone at the sam

Pump kept shutting off
