Understanding Your Electric Charges

Average kWh per day - The average amount of electricity purchased per day.

Basic Service Charge - A fixed monthly amount to cover the cost of providing service to your location.

Bright Choices® - The number of light fixtures and/or poles leased from Tampa Electric, and associated fees and charges.

Budget Billing - Optional plan takes the highs and lows out of monthly electric bills. This "leveling" billing plan averages your last 12-monthly billing periods so you can pay about the same amount for your service each month.

Energy Charge - The cost (excluding fuel) of producing the electricity you purchased, including conservation, environmental and capacity cost recovery charges.

Estimated - If Tampa Electric was unable to read your meter, "ESTIMATED" will appear. Your electric use has been estimated based on previous usage. The meter is scheduled to be read next month; any difference between the estimated and actual will be adjusted accordingly.

Florida Gross Receipts Tax - A tax imposed on gross receipts from utility services that are delivered to retail customers in Florida. In accordance with Chapter 223 of the Florida Statutes. The tax is levied on utility companies, which collect the tax from all customers, unless exempt, and remit to the state.

Florida State Tax - A privilege tax imposed on every person who engages in the business of selling or renting tangible personal property at retail in the state, in accordance with Chapter 212 of the Florida Statutes.

Franchise Fee - A fee levied by a municipality for the right to utilize public property for the purpose of providing electric service. Like taxes, the fee is collected by Tampa Electric and is paid to the municipality.

Fuel Charge - Cost of fuel used to produce electricity you purchased. Fuel costs are passed through from fuel suppliers to our customers with no markup or profit to Tampa Electric.

Kilowatt-Hours (kWh) - The basic measurement of electric energy used.

Late Payment Charge - For past due amounts more than $10, the late payment charge is the greater of $5 or 1.5% of the past due amount. For past due amounts of $10 or less, the late payment charge is 1.5% of the past due amount.

Municipal Public Service Tax - In addition to the Franchise Fee, many municipalities levy a tax on the electricity you use. It is collected by Tampa Electric and paid to the municipality.

Past Due - Previous charges that are past due are subject to a late payment charge fee and may result in disconnection.

Rate Schedule - The amount (rate) you pay depends on your customer category. The cost of providing service varies with the customer group.

Renewable Energy Fee - The amount of electricity purchased from renewable sources.

Share - A program co-sponsored by Tampa Electric and the Salvation Army where customers can help pay the energy bills of low-income customers in need. A one-time contribution can be made, or your monthly elected contribution will appear on your bill. Your contribution is tax deductible and is matched by Tampa Electric.

Total Amount Due - This month's charges will be past due after the due date shown. THIS DATE DOES NOT EXTEND THE DATE ON ANY PREVIOUS BALANCE. It is important that you pay your bill before this date in order to avoid interruption of service.

Zap Cap Systems - Surge protection for your home or business sold separately as a non-energy charge.

**Important Rate Information for Lighting Customers**

Starting in January 2019 your energy costs dropped compared to your 2018 bill. Starting in April, your electric bill should remain below 2018 levels, depending on your usage, even if the fuel portion of your bill is adjusted upward due to increasing costs of natural gas. Fuel costs are passed through from fuel suppliers to our customers with no markup or profit to Tampa Electric. If the proposed change is approved by the Florida Public Service Commission, starting in April 2019 and continuing through the end of this year, bills will be lower than last year and remain among the lowest in the state, even with this increase in fuel costs. This is all part of our commitment to safely provide reliable, affordable power to you.

Understanding Your Electric Charges

Average kWh per day – The average amount of electricity purchased per day.

Basic Service Charge – A fixed monthly amount to cover the cost of providing service to your location.

Bright Choices – The number of light fixtures and/or appliances leased from Tampa Electric, and associated fees and charges.

Budget Billing – Optional plan takes the highs and lows out of your monthly electric bill. This "leveling" billing plan averages your last 12 monthly billing periods so you can pay about the same amount for your service each month.

Estimated – If Tampa Electric was unable to read your meter, "ESTIMATED" will appear on your bill. Your electric use is estimated based on previous usage. The estimate is scheduled to be read next month, and any difference between the estimate and actual use will be adjusted accordingly.

Florida Gross Receipts Tax – A tax imposed on gross receipts from utility services that are delivered to retail customers in Florida, in accordance with Chapter 231 of the Florida Statutes. The tax is levied on utility companies, which collect the tax from all customers, unless exempt, and remit to the state.

Florida State Tax – A privilege tax imposed on every person who engages in the business of selling or renting tangible personal property at retail in the state, in accordance with Chapter 121 of the Florida Statutes.

Franchise Fee – A fee levied by a municipality for the right to collect public property for the purpose of providing electric service. Like taxes, the fee is collected by Tampa Electric and is paid to the municipality.

### Important Messages

**Important Rate Information for Lighting Customers**

Starting in January 2019 your energy costs dropped compared to your 2018 bill. Starting in April, your electric bill should remain below 2018 levels, depending on your usage, even if the fuel portion of your bill is adjusted upward due to increasing costs of natural gas. Fuel costs are passed through from fuel suppliers to our customers with no markup or profit to Tampa Electric. If the proposed change is approved by the Florida Public Service Commission, starting in April 2019 and continuing through the end of this year, bills will be lower than last year and remain among the lowest in the state, even with this increase in fuel costs. This is all part of our commitment to safely provide reliable, affordable power to you.

To view the adjusted lighting rates, please visit tampaelectric.com/rates, and select Customer Communications. If you prefer to receive a copy of the rates via U.S. Mail, please call 813-635-1500 and select Option 5 to make a request.

Proposal for St. Augustine sod along the vacant areas of Pictoral Park Drive on both sides of the Blvd and the median.

In this proposal is also the labor cost for the removal of healthy plant material in the new designated construction area where MI Homes will be cutting through the community berms.

After meeting on site with Stephanie Nieto on Friday 4/26/2019, she asked for a proposal to relocate the plant material to use them for fill in along the Blvd where like plant material is lacking, rather than having MI Home dispose of perfectly good plant material.

Waterway Inspection Report

Reason for Inspection: Routine Scheduled

Inspection Date: 4/19/2019

Prepared for:
Joe Roethke, Regional District Manager
Rizzetta & Company
9428 Camden Field Parkway
Riverview, FL 33578

Prepared by:
Morgan Melatti, Account Representative/Biologist

Aquatic Systems, Inc. - Wesley Chapel Field Office

Another large filamentous algae bloom has occurred within site #10. Remnants of filamentous algae from the last bloom treatment can be seen (bottom right) with a white hue. The filamentous algae bloom was targeted during the maintenance visit on 4/19/19, the same day as the pictured inspection. This is quite persistent growth and will be monitored.
**Site: 11**

**Comments:** Site looks good

Site #11 was seen in good condition during the site visit. The littoral shelf at the back of the site has been approved for an installation of native plants. The perimeter was noted with juvenile Arrowhead plants, which will be promoted.

---

**Site: 12, 19**

**Comments:** Site looks good

Site #12 (above) was seen in good condition with well kept shorelines and no surface algae growth. Site #19 (top and bottom right) was seen with turbid water, which may be a result of clay sediments and the recent rainfall.
**Site: 13**

**Comments:** Normal growth observed
Limnophila was noted with moderate growth in site #13 and will be managed to keep it within acceptable levels in the open water (above and top right). Grasses along the wild side were noted with signs of treatment and no new algae growth was seen in the site.

**Site: 16**

**Comments:** Normal growth observed
Normal amounts of filamentous algae was noted around the perimeter of site #16 (top right), which received treatment on 4/19/19. This is all that remains from a large algae bloom earlier in the month that received consecutive algacide applications.
Site: 17

Comments: Normal growth observed
Slender Spikerush was seen in both the submersed and emergent growth forms in site #17 (bottom right). Slender Spikerush and Peruvian Primrose along the wild side (top right) will be targeted at an upcoming maintenance visit.

Site: 38, 24

Comments: Normal growth observed
Site #38 was seen in good condition with minor filamentous algae growth (above). Site #24 (top and bottom right) is managed for Southern Watergrass, which was seen within acceptable growth levels.
Comments: Site looks good
Site #20 was documented with a large filamentous algae bloom during the last site inspection, which has been reduced significantly. Site #21 (top and bottom right) was seen with recently treated shoreline grasses and no new algae growth.

Management Summary

The waterway inspection report for Easton Park CDD was performed on April 18th, 2019 on ten sites in the community. A Native plant installation has been approved and scheduled for sites #1, #46 and #11 to occur in the middle of May. The plant installation is targeting areas of Easton Park waterways that are designed to hold plants, commonly called littoral shelves. Sites #10 and #38 were the first part of the installation plan, and received a Pickerelweed installation last year. The sites are being prepared for the planting by targeting any remaining or scarce amounts of invasive vegetation. This is especially important as the planting areas will not receive treatment for at least 90 days while the plants acclimate to the soil and water.

The most recent maintenance visit focused on filamentous algae treatments within sites #10, #16 and #18. Site #10 has already has a massive algae bloom this year, in February which was documented in monthly inspection reports. Site #16 was also noted with a large algae bloom earlier in the month, but has been brought back into normal growth levels after two consecutive treatments, much like site #20. Monitoring of persistent algae blooms in the Spring and Summer can prioritize sites that may need services outside of routine waterway maintenance.

Recommendations/Action Items

- Continue Routine Maintenance.
- Monitor Excessive and Recurring Algae Blooms.
- A Native Plant Installation is Scheduled for May 2019.
