## Fishhawk West CDD December Irrigation Maintenance

Sprinkler Solutions of Florida was on site throughout the month of December conducting routine maintenance, monitoring site conditions and inspecting the pumps for proper operation. Controllers A, G, H, I and L are all on the Hunter Centralus system and the communication systems are working as expected. Irrigation schedules on all controllers are being adjusted whenever possible to reduce water use without impacting the appearance of the landscape.

In addition to routine maintenance, the following issues were addressed:

- Replace non-functioning solenoid on valve A30.
- Repaired mainline leak on discharge side of pump at Dog Park.
- Replaced broken isolation valve in north tip of median on Village Center Drive, just south of Watercolor. This will allow the isolation of the pump at the F-Controller across from the Lake House from the pump at Encore.
- Verified zone M30 is now M52.
- Verified zone L11 is not in use and L46 does not exist.
- Will send estimate to replace pressure transducer on pump at C-Controller as soon as the owner has been identified.

According to the National Weather Service, Tampa International Airport received 2.88" of rain in the month of December, with 1.9" of rain being recorded on December 12<sup>th</sup>. Rainfall throughout most of the area was significantly less, with many areas receiving less than half an inch. Considering the historical average is 2.56", most areas were significantly below normal as the drought continues. In addition to below normal rainfall, the area saw increased temperatures, with a daily average temperature of 66.6 degrees. This is 1.7 degrees above the historical average of 64.9 degrees. This trend is expected to continue, with above normal temperatures and below normal rainfall predicted through March.

## SUMMARY:

Winter is here in Florida. After a hot summer it's nice seeing air temperatures drop and pond growth reduce. A few things to keep in mind during the cooler months. Dissolved oxygen levels are high and fish are thriving. We will receive abnormally hot winter days and Algae will bloom fast, when this happens this growth respond great to treatment. The last thing to watch for is invasive species struggling during freezes. Overall in a great spot moving into the new year. Hope the holidays were great and happy new years!
