

## **Pedestrian Gate Bollard**

August 16th, 2020

Golf carts entering from Kingsfield Lakes through the pedestrian gate, especially at night, is dangerous to occupants and gate equipment, has caused damage to the bushes at the gate and necessitates installation of a bollard deterrent. On August 31<sup>st</sup>, a bollard will be installed just outside the pedestrian gate between Forest Creek and Kingsfield Lakes. The bollard will be located approximately as shown in the photo and will not interfere with the pedestrian swing gate, bicycles or pedestrians. Residents can purchase a vehicle gate tag for their golf carts to use the vehicle entrance. The purchase form can be found [here](#).

Contact CDD Management if you have questions.
