

ACCEPTABLE USE POLICY FOR DISTRICT DEVICE AND INTERNET USE

****Please read the following agreement and keep pages 1-3 for yourself.**

**** The signature page must be completed and returned before DEVICE access will be provided.**

The following form must be read and signed by you **and** your parent or legal guardian. By signing this consent and waiver form, I agree to abide by the guidelines set forth in the Internet Acceptable Use Policy No. 815. I have discussed these rights and responsibilities with my parent(s) or guardian(s).

Further, my parent(s)/guardian(s) and I have been advised that the district does not have control of the information on the Internet, although it attempts to provide prudent and available barriers. Other sites accessible via the Internet may contain material that is illegal, defamatory, inaccurate, or potentially offensive to some people. While the Crawford Central School District's intent is to make Internet access available to further its educational goals and objectives, account holders could access other materials as well.

The district believes the benefits to educators and students from access to the Internet, in the form of information resources and opportunities for collaboration, far exceed any disadvantages of access. Ultimately, the parent(s)/guardian(s) of minors are responsible for setting and conveying the standards that their student should follow. To that end, the district supports and respects each family's right to decide whether to apply for the Crawford Central School District network access.

The student and his/her parent(s)/guardian(s) must understand that access to the Crawford Central School District network exists to support the district's educational responsibilities and mission. The specific conditions and services that are offered will change from time to time. By signing this acceptance waiver, you are agreeing to the use of various applications, email, and internet access in general to accomplish the educational goals of the district.

The internet is a compilation of many networks that supports the open exchange of information for research and educational purposes. The internet can be accessible to anyone, anywhere, anytime. Students must understand that by using the network, their actions can be monitored at any time by a teacher or administrator.

They may also use this information in disciplinary actions and will furnish evidence of crime to law enforcement.
