

MANAGEMENT OF STUDENTS WITH ASTHMA

In-service training on asthma will be provided to school personnel yearly. A professional registered school nurse will do the in-service training. The training will include symptoms, treatment and monitoring of students with asthma.

The in-service training will be based on the most recent edition of the AMES manual.

General (brief) training in symptoms, treatment and management of asthma is designed for all school personnel indirectly involved with students with asthma.

Intensive training on symptoms, treatment and management of asthma is designed for school personnel directly involved with the students with asthma.

All training will include “Asthma Rescue Procedures” (Appendix A) to be followed in the school setting.
