

# GLMS Robotics Information

The GLMS robotics team is hosting an informational meeting on Wednesday August 27 in the GLMS library from 530 to 630. If your student is interested in our robotics program or you want to know more, please plan on attending. You can also contact George McKenzie at 517-745-7137 or [Glmckenzie936@gmail.com](mailto:Glmckenzie936@gmail.com) for information. We will provide information on our program, tentative plans for the season, possible meeting times and dates through the fall. Our season runs from early September to early December and then we meet less during the rest of the year. We are also looking into a kickoff viewing get together on September 6 where our new season challenge will be presented by first robotics. We are also looking for volunteers to help mentor our students and allow us to complete more complicated robots.
