#### **Site Assessments**

#### Pond 1

#### **Comments:**

Site Looks Good

Pond 1 continues to look great. The water level has continued to drop and is low. No issues were observed with algae, submersed weeds, or shoreline weeds. Shoreline weeds were previously treated and positive results were seen. No dead fish were observed.

#### Pond 2

#### **Comments:**

Site Looks Good

The Slender Spike Rush was treated previously and positive results have been seen. A minimal amount of decaying Slender Spike Rush was observed in a few small areas around the shoreline perimeter. Follow up treatments will be performed to continue to reduce this new growth. No issues were observed with algae or shoreline weeds.

#### **Site Assessments**

#### Pond 3

#### **Comments:**

Site Looks Good

The water level on this pond has continued to drop and is at a low level. No issues were observed with algae, submersed weeds, or shoreline weeds. There was an erosion area observed around the inflow pipe on the southern bank. Shoreline weeds have been treated on the exposed shoreline perimeter.

#### Pond 4

#### **Comments:**

Site Looks Good

Pond 4 continues to look great.

Previous treatments for shoreline weeds, including Torpedograss, have shown positive results. No issues were observed with algae, submersed weeds, or shoreline weeds. The pond level has continued to drop.

www.AdvancedAquatic.com lakes@advancedaquatic.com

## **Site Assessments**

#### Pond 5

#### **Comments:**

Site Looks Good

The water level has continued to drop, and is at a low level. A few small patches of Slender Spike Rush on the exposed shoreline were previously treated and positive results were seen. No issues were observed with algae, other submersed weeds, or shoreline weeds.

#### Pond 6

#### **Comments:**

Normal Growth Observed

The water level is currently low. Slender Spike Rush was observed on the exposed bank, most of this growth has been previously treated and positive results were seen. The remainder will be targeted for treatment during the upcoming visits. No other issues were observed.

#### **Site Assessments**

#### Pond 7

#### **Comments:**

Site Looks Good

Shoreline weeds were treated previously and positive results were seen. No issues were observed with algae, submersed weeds, or shoreline weeds. The water level has continued to drop and is low.

#### Pond 8

#### **Comments:**

Site Looks Good

Shoreline weeds were previously targeted for treatment and positive results were seen. No issues were observed with algae, submersed weeds, or shoreline weeds. The large erosion area is still present.

### Waterway Inspection Report | Page 6

## **Site Assessments**

#### Pond 9

#### **Comments:**

Site Looks Good

A very minimal amount of Baby Tears was observed around the shoreline perimeter just below the water surface. If any issues with Baby Tears are observed, treatments will be performed. The water level is currently low. No issues were observed with algae or shoreline weeds.

#### Pond 10

#### **Comments:**

Site Looks Good

Pond 10 looks good. The water level has continued to drop. The shoreline weeds were previously treated and positive results were seen. No issues were observed with algae, submersed weeds, or shoreline weeds.

Erosion areas are still present, mainly a large spot near the inflow pipe which can be seen in the picture on the right.
