JOIN THE GLOBAL < MAKER & STEAM > MOVEMENT!

Back by popular demand, this **all-ages** Parent University event invites families to join the technology department for a hands-on night of **Making, Coding and STEAMing** (Science, Technology, Engineering, Arts, and Math) exploration. You will try MakerSpace activities, coding with your family, and learn about the fundamental ideas behind our **innovation and design mindset**. Families will have the opportunity to learn and problem-solve through exploration and play. Popular activities from last year's family night are back, along with some new ideas and activities to explore!

Please **RSVP** by clicking **HERE** to help us prepare for the event. Walk-ins are welcome, too!
