

G Suite for Education (a.k.a Google Apps) is an integral part of District 64's Digital Learning Ecosystem. Students are given the opportunity to use this powerful productivity tool in their learning environments. In this Parent University session, you will learn about Google Drive, how it works, and the awesome suite of apps students can use to practice their creativity, critical thinking, communication, and collaboration skills. We will go over the basics of Google Drive and highlight some of the great ways G Suite is used for student learning and supporting students as they practice the 4C's – communication, collaboration, critical thinking, and creativity.

All parents and community members are welcome.
