QUESTIONS TO BE ANSWERED REGARDING FACILITIES IMPROVEMENTS
January 14, 2013

1. How much money will the District allot to facilities improvements projects over the next several years?
 - a. Will this money be parceled out at a particular rate per year, or may the District spend more or less in a particular year as long as the total stays below the approved amount?
 - b. Should specific projects be slated (at least tentatively) for particular years? (E.g., will the District do the Field air conditioning project in summer 2013 and summer 2014?)
2. Will the District borrow money in order to fund facilities improvements?
3. Will the District pursue a performance contracting approach or a traditional contracting approach to the Field project?
