

Special Needs

District 64 provides art instruction for all children. Children who have special learning needs are most often identified as having an Individualized Education Plan (IEP) or a 504 Plan. They may come to art in a specific class to meet their needs and/or be mainstreamed into regular education art classes. Art teachers work with the special needs of all students and make modifications where they determine it is needed. The art teachers work with the appropriate personnel of the District that assist in identification, planning, delivery, and reporting for the special needs of students.
