

"I read it on the Internet,
so it must be true."

A Parent's Guide to Information Literacy

Want to give your student an "Educational Edge?" Please join us at Parent University on March 23, 2015, where we will be discussing how to practice online discernment in our 21st Century learning environment. This interactive session will teach you how to help your student determine if an information source is reliable, how to evaluate the credentials of the information provider, how to implement better search strategies, and why we need to practice media literacy. All these skills are critical to growing responsible, informed, and safe digital citizens.

Facilitated by Denise Reeder and Dianne Olson,
D64 Library Information Specialists
