Coding and Computational Thinking

Computer Science helps nurture creativity and problem-solving.

This year the International Hour of Code - a global student movement expanding 180+ countries - is scheduled for December 7th-13th. Students of all ages are encouraged to take part in creating technology that is changing our world. Join us for this Parent University featuring information and hands-on exploration of coding. We will also share resources to practice coding at home, and the plan at each of our buildings to spend an Hour of Code in December.

HOUR OF CODE

The Hour of Code is coming.

Help introduce 100m students to computer science. **What 90% of schools don't teach.**

Hosted at

Lincoln Middle School

Learning Resource Center (LRC)

200 S. Lincoln Avenue in Park Ridge

Thursday, December 3, 2015
6:00pm to 7:00pm

This program is geared towards parents of all school-age students.

Facilitated by Megan Preis
D64 Instructional Technology Coach
